Introduction

A Community Health Assessment (CHA) is a local health assessment that identifies critical health needs through data collection and analysis. The CHA paints a comprehensive picture of a community's current health status; factors contributing to higher health risks and poorer health outcomes; and provides a foundation to improve the health of all people in Door County.

A CHA is a requirement for both health departments and non-profit hospitals. Wisconsin State Statute 251.05¹ requires local health departments to complete a Community Health Assessment (CHA) and Improvement Plan (CHIP) every five years. For non-profit hospitals, such as Door County Medical Center, IRS Code, Section 501(r)(3)² requires this process be conducted every three years.

New for 2025, our CHA and CHIP efforts have been rebranded under the shared identity of **Healthy Door County**. Healthy Door County represents a collaborative network of community partners dedicated to improving the health and well-being of all who live, work, and visit Door County. The 2025 CHA was developed by a workgroup—led by Door County Public Health and Door County Medical Center, with support from United Way of Door County, Destination Door County, and UW–Madison Extension. As we transition from assessment to action, a CHIP Leadership Team will take shape to guide implementation of strategies and partnerships focused on the priority areas identified through this CHA.

Social Determinants of Health

What are social determinants of health? ³

Social determinants of health (SDOH) are the conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

Social determinants of health (SDOH) have a major impact on people's health, well-being, and quality of life. Examples of SDOH include:

- Safe housing, transportation, and neighborhoods
- Education, job opportunities, and income
- Access to nutritious foods and physical activity opportunities
- Discrimination and violence
- Polluted air and water
- Language and literacy skills

2023-25 CHIP Recap

Our **2023-2025 Community Health Improvement Plan (CHIP)**⁴ cycle was shortened due to the ongoing impacts of COVID-19, which shifted community needs and delayed the launch of several initiatives. Despite this condensed timeline, meaningful progress was made across each of our focus areas. The highlights that follow showcase the collaborative work, community partnerships, and measurable steps taken toward improving the health and well-being of Door County residents.

GOAL AREA 1: WORKFORCE

Protection and prioritization of local workforce & residents

- UW-Madison Extension offered a series of town halls and a survey to tap into the needs of our service industry workforce.
- The Workforce Development Committee was established to share insights from a cross-sector group of business leaders. The group is in the process of establishing NextWave, a young workforce networking group.
- Door County Economic Development Corporation improved their website highlighting popular community resources in their new "Working Here" section of their site. An ad hoc group of the Workforce Development Committee is working with visitor centers to promote available resources to locals.
- The Door County YMCA and Door County Medical Center partnered to launch the Wellness Works Newsletter geared toward workforce education and community resources.

GOAL AREA 2: HOUSING

Access to equitable housing

- The Attainable Housing Committee has been re-established.
- An inventory of available units is being managed by Door County Economic Development Corporation.

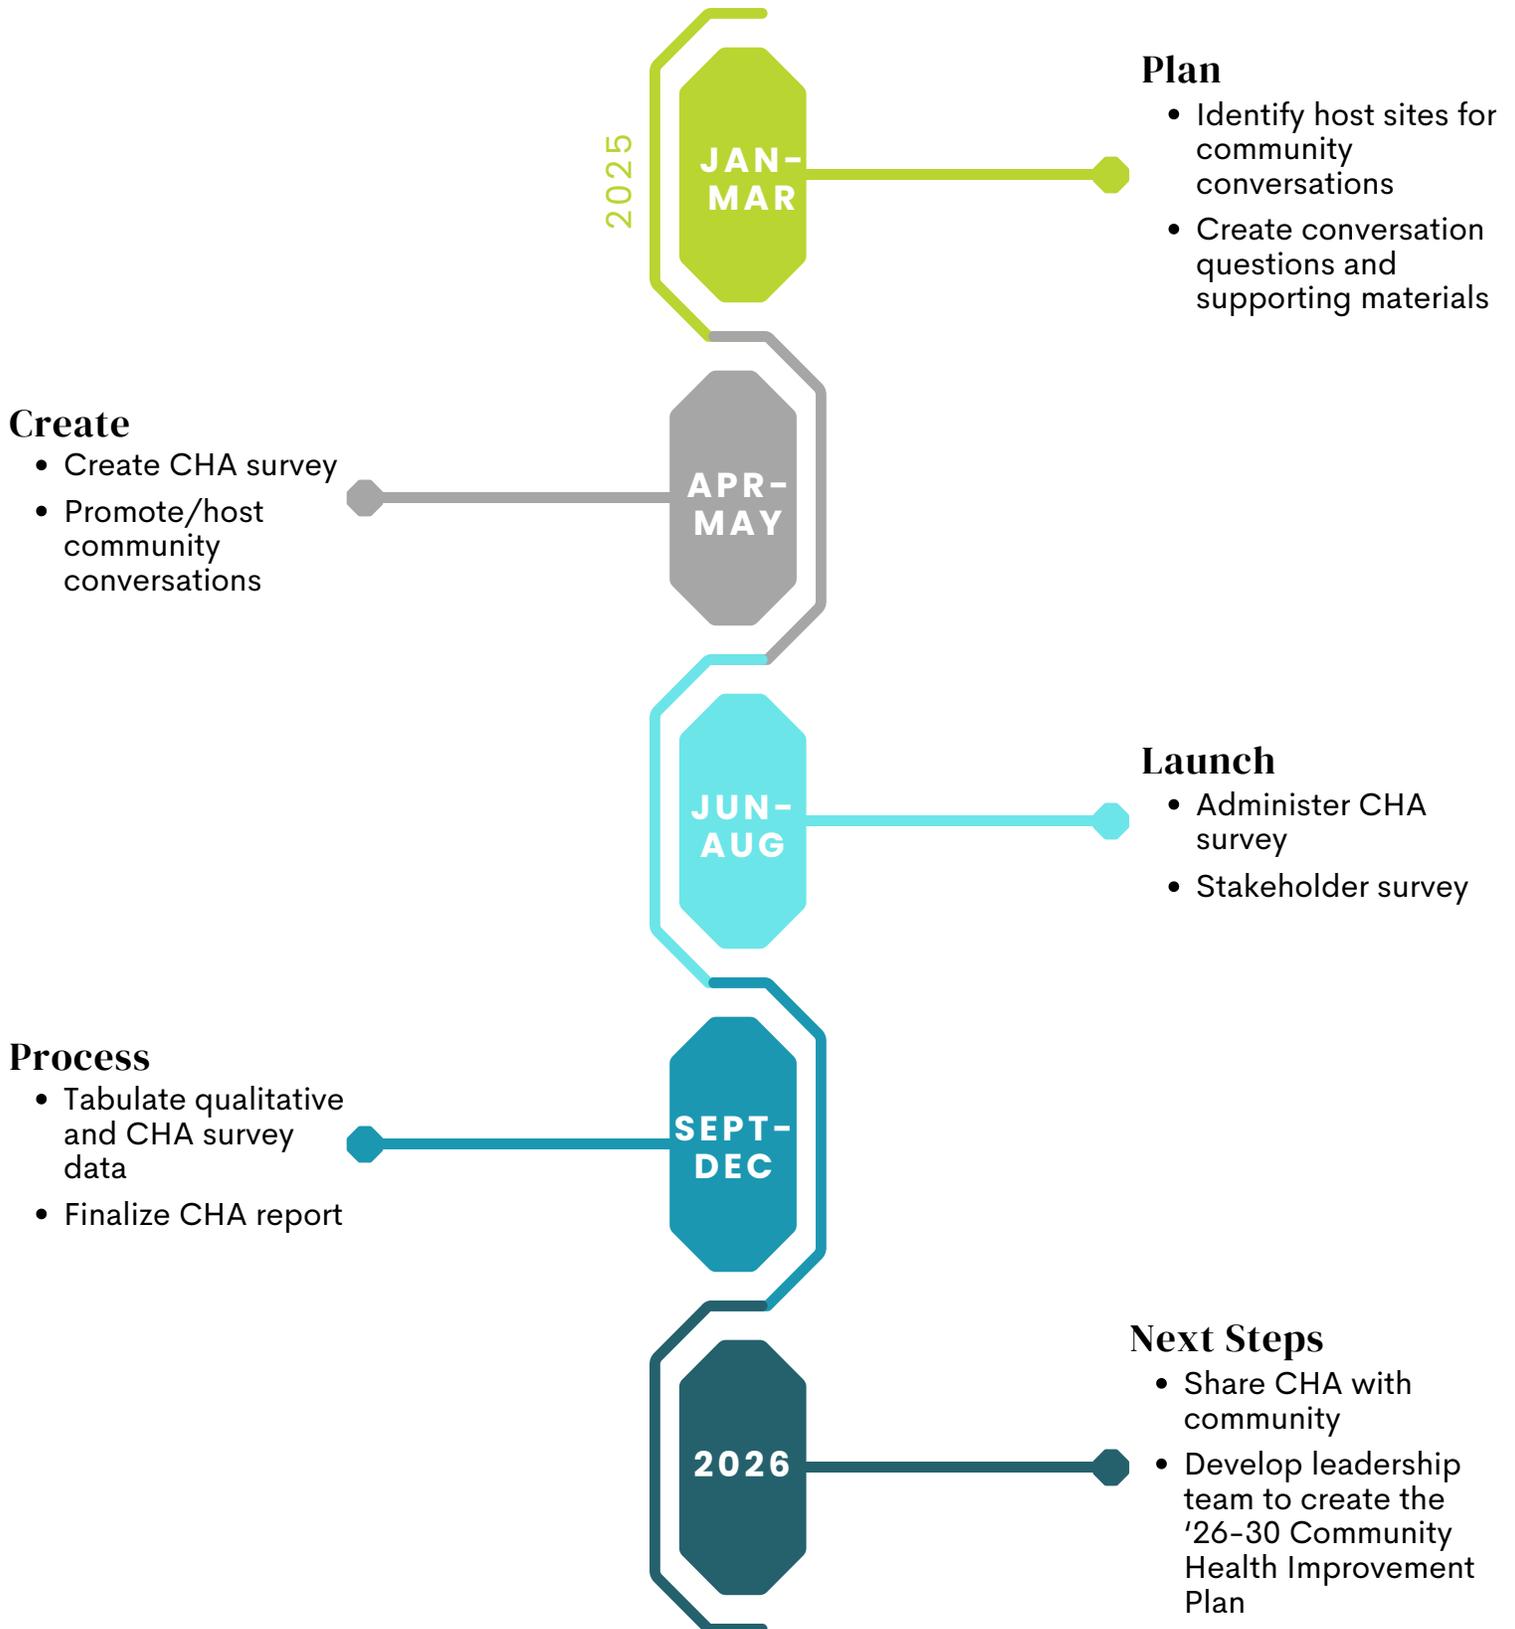

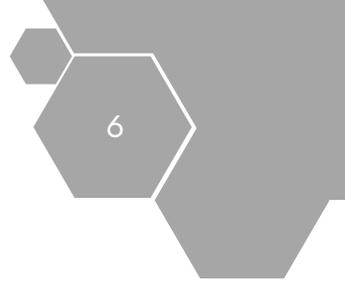

GOAL AREA 3: SOCIAL CONNECTEDNESS

Improve mental health through social support networks

- Steps were taken to re-establish a NAMI chapter for Door County. Door and Kewaunee counties are partnering to launch NAMI Peninsula in 2026.
- "Screenagers" social media safety programming happening at all five school districts. National speaker Percy Brown presented to all middle and high school students.
- CredibleMind, an online platform, launched in spring 2024, providing residents with access to expert-vetted mental health resources. Since launch, more than 3,400 users have engaged with the platform and completed nearly 1,000 assessments.
- United Way continues to connect volunteers to opportunities and a standalone website is coming soon.
- Destination Door County added a Non-Alcoholic Beverage "NAB" designation in 2025 to business profiles to support those in recovery or abstaining from alcohol. This was paired with a social media campaign to its 152K followers.
- The Alcohol & Other Drug Coalition, Live Well Door County, Door County YMCA, and various other community organizations have partnered to offer additional programming to enhance a sober-active community.

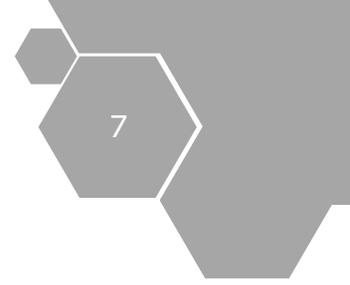

Process Overview

Timeline

Process Overview

Data Collection

Community Conversations

Door County Public Health hosted **five community focus groups** representing four key populations: families with young children, Hispanic residents, rural residents, and young adults. (See Appendix A) These conversations were organized in collaboration with the Door County Partnership for Children & Families, Door County YMCA, Door County Medical Center, Carroll House Restaurant, Door County Economic Development Corporation, and St. Francis & St. Mary Parish. Participants discussed their perspectives on health and well-being, community strengths and challenges, personal struggles, and the changes they would like to see in their communities. To recognize their contributions, participants received a \$25 Destination Door County gift certificate. Some focus group locations also provided refreshments and/or child care to support participation.

8

Stakeholder Questionnaire

As the second component of our assessment, Door County Public Health conducted an online stakeholder questionnaire to gather insights from community leaders across multiple sectors. (See Appendix B) Like the community conversations, this assessment explored perceptions of health and well-being, community strengths and challenges, and opportunities for improvement. The questions mirrored those used in the community conversations but asked respondents to answer from the perspective of their organization, considering how their work could support the health of their staff and the broader community. In total, **22 community leaders participated**, representing sectors such as education, health care, emergency services, local government, nonprofit organizations, media, manufacturing, child care, and faith-communities.

Child Care

**Aging
Population**

Process Overview

Data Collection

Community Health Survey

From June through August, **973 surveys were completed**—868 of those online and 105 on paper. (See Appendix C) Paper copies were available at the ADRC and satellite meal sites, JAK's Place, Door County YMCA, and the Public Health Office. The survey was offered both digitally through Jotform and in physical paper form, with each available in English and Spanish. It was open to individuals age 16 and older who live and/or work in Door County and focused on participants' perceptions of health and well-being.

Promotion was largely handled over social media and via email. Aiding in the success of the survey was paid media and in-person community events such as the Door County Fair and the Sturgeon Bay and Jacksonport Farmer's Markets. Additionally, a weekly gift card giveaway helped incentivize participation.

To understand what residents see as the most pressing issues in our community, participants were asked to rank their top three areas for improvement.

Top Themes

Housing

**Jobs with
Livable Wages**

Child Care

Priority Areas

Housing

Access to safe and affordable housing was the top concern of survey respondents; **45.7% of survey respondents selected "Safe and Affordable Housing"** as a top area for improvement. (See Appendix D) In Door County, 27.1% of all households and 38.6% of renters have burdensome housing costs, defined as spending 30% or more of household income on housing.¹

Jobs with Livable Wages

The second highest area of concern among survey respondents was Jobs with Livable Wages (36.4%). Wages have not increased enough to keep up with the rising costs of basic needs. In 2023, the median household income in Door County was \$71,785, whereas the state median was \$74,631, but **the cost of living is estimated to be about 25% higher in Door than the state average.**²

Child Care

Affordability and access to child care emerged as significant concerns among survey respondents and qualitative study participants. In Door County, **families with two children spend nearly one-third (29%) of their household income on child care**³, and 28.4% of survey respondents identified child care as one of the community's top areas in need of improvement. Efforts to expand capacity have been offset by the closing of a center and ongoing staffing issues.

Aging Population

Door County is the **third oldest county in Wisconsin by concentration of residents ages 65 and older**, with a **median age of 54.1**.⁴ This aging demographic has important implications for community planning and public health, as evidenced by the fact that **over 25% of EMS calls are for falls**.⁵ Together, these indicators point to increased demand for healthcare services, fall prevention efforts, senior care, and transportation. The aging demographic presents ongoing challenges related to workforce and caregiver capacity.

Opportunities to Socialize

Opportunities to socialize was the second most discussed area of concern in community conversations, with respondents expressing concerns about screen time and limited social options outside of bars. Young adults and parents of young children reported challenges connecting with others outside of work, indicating a need for accessible and inclusive community spaces that support social interaction. **31% of Door County adults reported that they always, usually, or sometimes feel lonely**,³ suggesting that social isolation affects multiple groups within the community.

Community Profile

Spanning 492 square miles of land and over 300 miles of shoreline¹, Door County is home to roughly 30,500 people², largely centered around the City of Sturgeon Bay.

Door County is unique amongst Wisconsin counties due to its aging population and tourist economy. It is comprised of the following 19 municipalities³:

Community Profile⁷

In 2023, Door County had 4043 millennials (ages 25–39). The national average for an area this size was 6207.

In 2023, Door County had 15,067 people 55 or older. The national average for an area this size was 9148.

In 2023, Door County had 2158 racially diverse people. The national average for an area this size was 12,554.

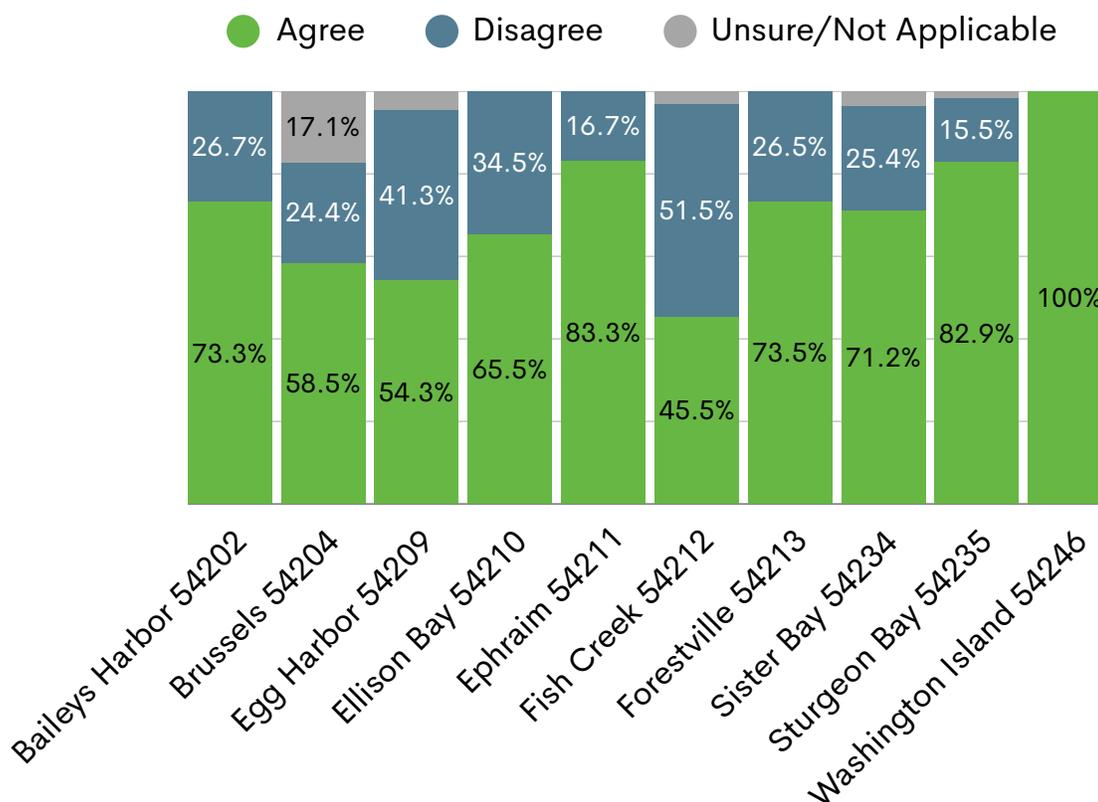

Community Profile

INTERNET ACCESS

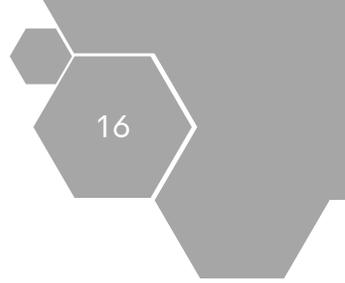

Thanks to state and federal grants as well as local investment, Door County has received over \$31 million in funding to build out high-speed fiber broadband to thousands of locations across the County. That means faster, more reliable internet for families, students, workers and businesses.

Some areas have started construction already and others are getting ready to start soon. This large project is called FiberNet Door County, and it's helping make sure everyone, no matter where they live, can get online. If you have questions on what is happening in your area, please reach out the Broadband Coordinator, Jessica Hatch.⁸

The below values were response to "I have access to fast and reliable internet" on the Community Health Survey. **"Reliable Cell and Internet Service" was selected by 37%** of survey respondents as a top area for improvement in the Physical Environment category. (See Appendix D)

	54202	54204	54209	54210	54211	54212	54213	54234	54235	54246

Unsure or N/A	0	7	2	0	0	1	0	2	9	0

Community Profile

Respondents were asked to select their top three (3) favorite parts of the County. Of the 971 respondents who completed this question, over half (51%) selected "Access to parks, trails, and beaches."

FAVORITE PARTS OF COUNTY

"Door County offers such a variety of things to do. We have a strong arts community that offer many hand on experiences ... There is music everywhere you find groups of people. The farmers markets and roadside stands offer something unique at each location along with the Door County Seed Library that offers learning and nutritional options for self-sustainability. Door County Land Trust, nature preserves and state parks offer hiking and learning opportunities."

- Community Leader

Economic Stability

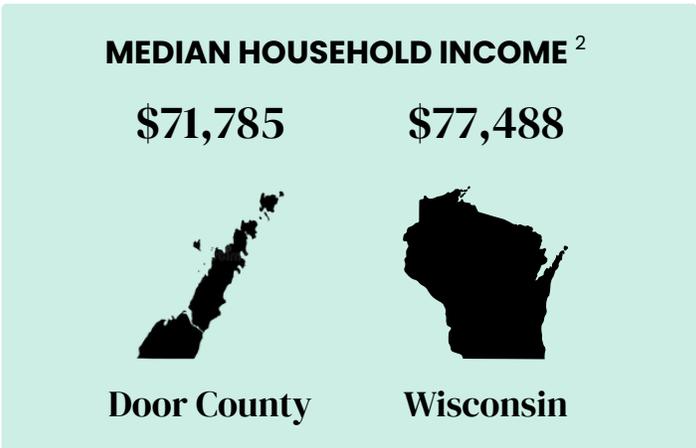

Employment & Income

In 2023, about **14,500 people were employed in Door County**. A defining feature of the local workforce is the county's median age of 54.1, significantly older than the national average of 38.7 and indicative of a large population nearing or entering retirement, an ongoing challenge for maintaining a stable labor force.¹

While the county's median household income has risen, many positions in hospitality, retail, and service sectors continue to offer modest wages.

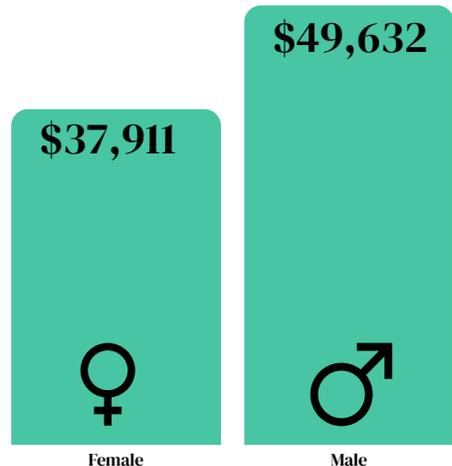

Living Wage \$47.04

an annual salary of nearly \$98K for one adult with two children³

3.9X

In Door County, households with higher incomes had income 3.9 times that of households with lower incomes⁴

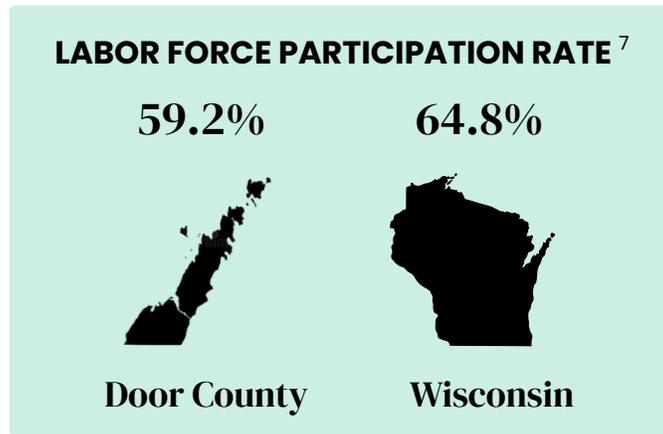

Median individual income differs by sex in Door County. **Males earn 1.3 times more** money than females in 2023⁵

Employment & Income

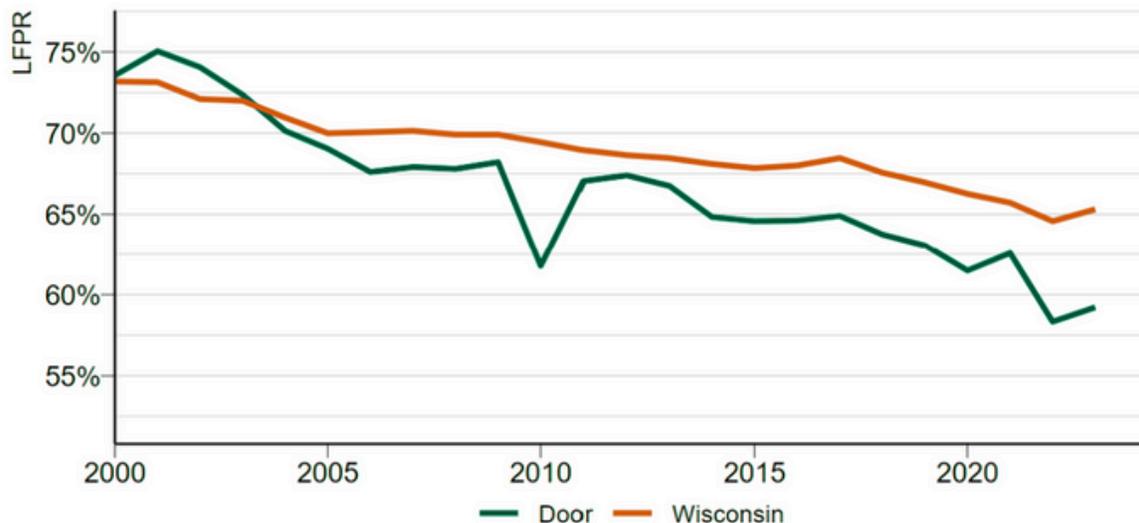

Unemployment in Door County remains low at 3%⁶, reflecting a strong local labor market. This rate is on par with the statewide unemployment rate of 3% and slightly below the national rate of 3.6%⁶. Historically, unemployment in the county has ranged between 5% and 7%⁶. The current percentage represents the **lowest unemployment Door County has experienced in the past 20 years**, highlighting sustained economic stability and a high level of workforce participation.

Like most counties in the state, Door County has experienced a notable decline in its labor force participation rate (LFPR) since 2000. The declining LFPR largely reflects the county's changing age composition and retiring baby boomers.⁷

Door County's **LFPR in 2023 was 59.2%, down 14.3%** compared to 2000.⁷ The county's LFPR ranks 51st in the state and has been below the statewide rate since 2004.⁷ Among other variables, this measure illustrates the longer-run workforce quantity challenges ahead.

From 2018 to 2023, jobs increased by 2.4% in Door County from 15,656 to 16,028. This change fell short of the national growth rate of 4.3%. As the number of jobs increased, the LFPR decreased from 60.7% to 54.6% between 2018 and 2023.⁸

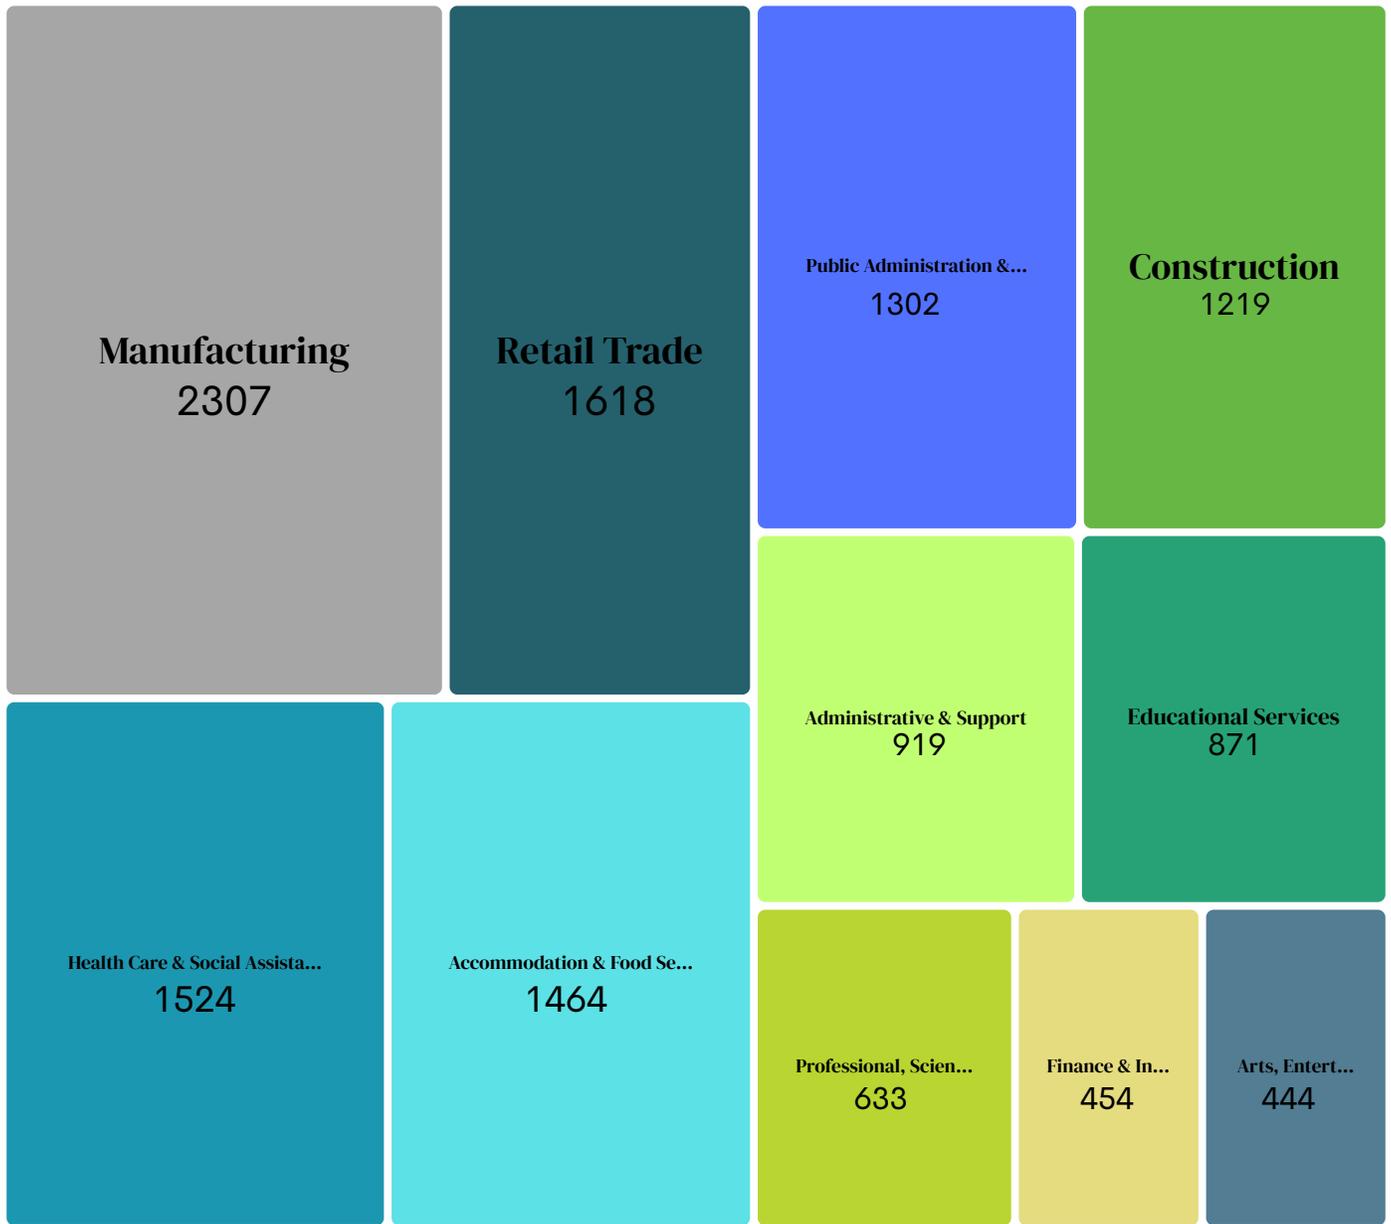

Employment & Income

LARGEST INDUSTRIES

Door County's economy is shaped by a mix of tourism, services, and long-standing manufacturing and retail industries. In 2025, **Door County was host to 1292 employers.**⁹

The below table represents the number of jobs in each industry as of 2023.¹⁰ (See Appendix F)

Employment & Income

TOP EMPLOYERS

Door County Economic Development Corporation surveyed major employers in November and December 2025 for **full-time employee count**.¹¹

Employer	Current Full-Time Employee Count
Fincantieri Bay Shipbuilding	887
Door County Medical Center	600
Hatco Corporation	365
County of Door	325
Therma-Tron-X	270
Sturgeon Bay School District	230
N.E.W. Industries	206
Southern Door School District	200
Marine Travelift, Shuttlelift & ExacTech	170
Gibraltar School District	130

“Finding enough qualified employees willing to work full time, year-round. The surrounding area from which we are able to recruit is narrow and commute times quickly get long. We have found commutes beyond Green Bay are not sustainable long term.”

- Community Stakeholder

Housing

Nearly half (45.7%) of survey respondents selected “Safe and Affordable Housing” as an area of improvement in Door County. In Door County, 13% of households spent half or more of their income on housing, compared to 11% in the state.¹

In Door County, **27.1% of all households have burdensome housing costs.**² Burdensome housing is defined as spending 30% of your household income on housing. Renters face a significantly higher rate of burden than homeowners.

Burdensome housing costs were experienced by different groups at the following rates²:

- Renters: 38.6%
- Homeowners with mortgages: 30.4%
- Homeowners without mortgages: 17.2%

According to Zillow.com, the **average home value in Door County in 2025 was \$418,951**, whereas the state average was \$331,195.³

Despite this higher average home value, Door County residents make less than the state average. In 2023, the median household income was \$71,785, whereas the state median is \$74,631.⁴

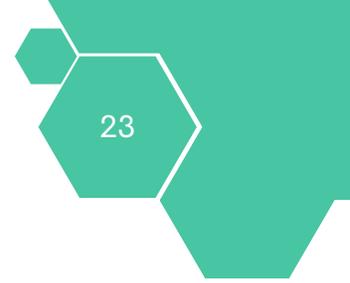

According to Door County Economic Development Corporation, the average worker in Door County earns \$44,202 (2024 Q2); the national average was \$70,857 (2024 Q1).⁵

“I left my former unit because I had no working shower or heat. My family had to use a space heater we bought during winter and shower at the YMCA. I moved into the first new unit I could find, and the cost difference is hefty.”

- Survey Respondent

“I've also noticed in the community the lack of affordable housing. They call it affordable, but I'm sorry, a two-bedroom for almost \$2,000 a month is not affordable.”

- Community Conversation Participant (Families with Young Children)

Housing

“Safe and Affordable Housing” was the top response to the social and economic area for improvement and the number one area for overall improvement. (See Appendix D) 7.7% of survey respondents were worried about losing housing or did not have a reliable place to live. Families with children reported more vulnerability to affordability and space concerns.

Nearly 4 in 5 homes are owner-occupied⁷ adding to the complexity of available rental units in the county. Further, more than **500 new short-term rental businesses** have been created in Door County since the start of 2018.⁸

Community members said:

“The amount of short term rental properties, plus second home owners is taking up needed resources for full time residents. Second home owners are buying homes sight unseen and taking away opportunities for locals to afford something within their budget.”

“The housing is not affordable ... Every time we get a raise our rent goes up and takes whatever extra we are earning. It is difficult to save money. If we didn’t have a paycheck we would quickly be without a place to live.”

“My family moved from unsafe housing (no working shower, landlord threats) to a new place that costs \$600 more per month. We were lucky to find housing but the increase means less money for food, gas, and necessities and I have had to skip my medication for months to afford it [rent].”

“There are a lot of very good families whose kids have moved out of the area that are looking to move back in the area, and they can’t. Goes back to housing affordability or being able to buy just land.”

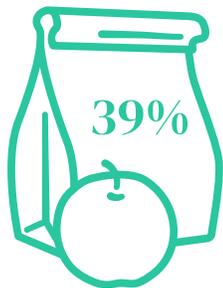

Food Access & Insecurity

Door County has relatively strong food access compared to state and national averages, earning a 9.0 out of 10 on the Food Environment Index¹, yet food insecurity remains a concern for some residents. About **10% of people lack a reliable source of food**, and 4% experience limited access to healthy foods due to income or location.

Nutrition assistance programs such as FoodShare/SNAP supported over 1,000 households in December 2025, and local food pantries help address gaps, but rising costs for food, housing, and utilities continue to strain household budgets and threaten food security.

LIMITED ACCESS TO HEALTHY FOODS¹
(low income, not close to grocery store)
County: 4%
State: 5%
Nationally: 6%

of children (1360) in Door County public schools were eligible for free or reduced price lunch.¹

Compared to 55% nationally

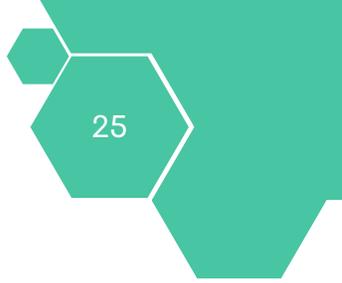

The cost of living (food/utilities/rent) is dangerously close to income.

5. Stella Maris
6. Feed and Clothe My People
7. Lakeshore CAP
8. Holy Name of Mary Food Pantry
9. Sturgeon Bay Community Church
10. Bay View Food Pantry

Door County is fortunate to have **ten food pantries** from Maplewood to Washington Island, helping to meet food access needs across a geographically expansive and largely rural county.³ The Door County Food Pantry Coalition plays a key role in coordinating efforts among these pantries. Despite this strong network, access challenges remain. Many food pantries operate with limited hours and days of service, which can pose a barrier for working individuals and those who must travel longer distances. Funding fluctuations, staffing constraints, and reliance on volunteers can further affect consistent access to food.

UW-Madison Extension created the **Northeast Wisconsin Food Access Map**⁴ that outlines grocery stores, food pantries, and other food outlets in Northeast Wisconsin, including Door County.

Education Access & Quality

Education Overview

Door County has five public school districts to support the **3,213 students enrolled for the 2024-25 school year**.¹ Enrollment decreased 0.9% than the previous year, according to the Wisconsin Department of Public Instruction.² The national average student to teacher ratio is 15:1, while Wisconsin's public school ratio is 14:1.³ Door County student to teacher ratios are listed below by school district.

Additionally, Door County has two parochial pre K-8th grade schools serving 228 students.⁴ It is estimated that "over 70 families in Door County home educate" in 2025 according to Peninsula Roots, which organizes social and enrichment activities for homeschooled children.⁵

Education Overview

All public schools in Door County performed at or above “exceeds expectations” per DPI’s annual report cards and improved scores from 2023-24 to 2024-25.⁷ The average gap between actual and required **spending per student is \$8057 more** in Door County. Required spending is an estimate of dollars needed to achieve average US test scores.⁸ Door has the second highest per-student spending in the state. (See Appendix E)

School	% Economically Disadvantaged 2024-25	% Students with Disabilities	English Learners <i>English as a Second Language</i>	DPI Report Card 2024-25 ⁹

Washington Island	34.4%	13.1%	0.0%	83.5

Graduation & Higher Education

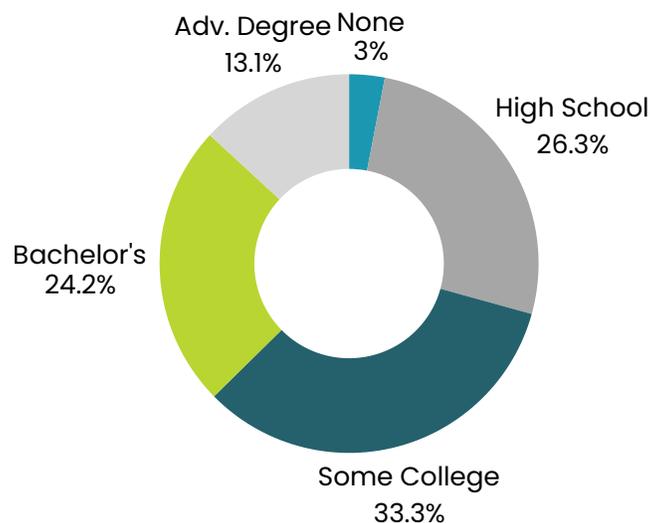

Door County has limited higher education options within the county, reflecting its rural geography and small population. However, residents do have access to postsecondary and workforce training through the NWTTC Sturgeon Bay campus, which offers a range of technical education, certificates, and continuing education programs.

The county also benefits from a strong youth apprenticeship program that connects high school students with local employers and career pathways. In addition, four-year universities and expanded degree options are available within commuting distance in Green Bay and surrounding communities, helping to broaden educational opportunities for Door County residents.

In Door County, **97% of adults (age 25 or older) had a high school degree or equivalent**, such as a GED, compared to 89% nationally. Further, 77% of adults (age 25-44) had completed some post-secondary education, including vocational/technical schools, junior colleges, or four-year colleges. This includes those who had and had not attained degrees.¹

BACHELOR'S DEGREE OR HIGHER (2023)¹

County: 37.1% | State: 33.8%

“We don't have the resources to necessarily hire the teachers we need and places for them to live. It's hard for the teachers to be good mentors also, they don't have the resources. There's just too much that we're relying on from the school system in our community right now.”

- Community Conversation Participant (Rural)

Child Care

Door County currently has two full-time licensed daycare centers—Doorway to Learning and Northern Door Children’s Center.

Zion Early Childhood Center in Egg Harbor closed at the end of 2023 and Adventures Child Care in Brussels closed in early 2024, shortly before a new center in Sturgeon Bay, Children First, briefly opened its doors. To ensure long-term financial stability, Children First merged with Door Community (DOCO) Child Development Center on December 1, 2024, forming Doorway to Learning.

In fall of 2024, Washington Island Child Care opened offering licensed care Monday–Thursday. There is only one licensed in-home provider in the county and several unregulated providers.¹

The Door County YMCA offers a preschool readiness program for 3–4 year-olds four days a week with the option for wrap-around care for all day coverage as well as before and after school care for children 4K through age 12.² The Boys & Girls Club offers after school care for ages 7–17.³

United Way of Door County manages a [Child Care Directory](#) outlining all options in the county.

Capacity: 146 children⁴

Capacity: 130 children⁵

Capacity: 10 children⁶

1190 children aged 4 and under in Door County⁷
for approximately **300 licensed child care slots**

“It’s extremely hard as a young family trying to afford cost of living, especially throwing in costs for daycare needs. There is no way we would have been able to afford full time daycare, and as is, me being a part-time SAHM makes it very hard as I hardly get a paycheck after our higher cost of insurance is taken out. It’s extremely disheartening.”

– Survey Respondent

Child Care

According to Molly Gary, Child Care Community Coordinator at United Way of Door County, "More than demand, the real issue is affordability. For many families, child care costs more than their mortgage or rent and health insurance combined. **While it's recommended that childcare not exceed 7% of a family budget, the reality is that it often is more than 30%.**"

25% of survey respondents ages 19-49 with child(ren) in the household said availability of child care impacted their ability to get, keep, or move up in a job.

29% the average household spent 29% of its income on child care for two children.⁸

69% of Northeastern Wisconsin child care providers reported having a waitlist.⁹

CHILD CARE WORKFORCE

In Door County, hourly wages for childcare workers typically range from about \$15 to \$20 per hour, based on recent job postings for early childhood educators and childcare assistants.¹⁰ These local wages are comparable to, and in some cases slightly higher than, the Wisconsin

statewide average, which generally falls in the mid-teens range (approximately \$14–\$16 per hour).¹¹

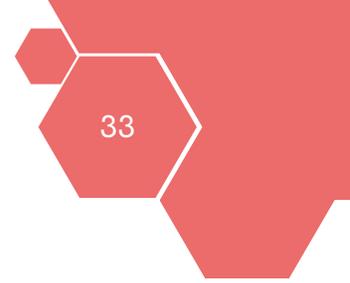

Overall, childcare pay in Door County appears to be at or above the state average, particularly for positions requiring additional experience or credentials.

In 2021, Door County received a \$3.5M grant to support child care initiatives.¹² In addition to supporting a new facility in Sturgeon Bay and expanding the Northern Door Childcare Center, funds supported staff retention and family providers for the last three years. However, the funds have been spent and are no longer available. "Designated public funding will be essential to the long term viability of child care in Door County," Gary said.

Health Care Access & Quality

Access to Care

Overview

Door County's healthcare landscape is anchored by Door County Medical Center (DCMC), a critical access hospital that has served the community for over 80 years. DCMC provides a full spectrum of services, including primary care, birthing center, specialty care, emergency medicine, and advanced diagnostics. With clinics in Sturgeon Bay, Sister Bay, Washington Island and Algoma, as well as visiting specialists, DCMC provides residents across the county access to care close to home.

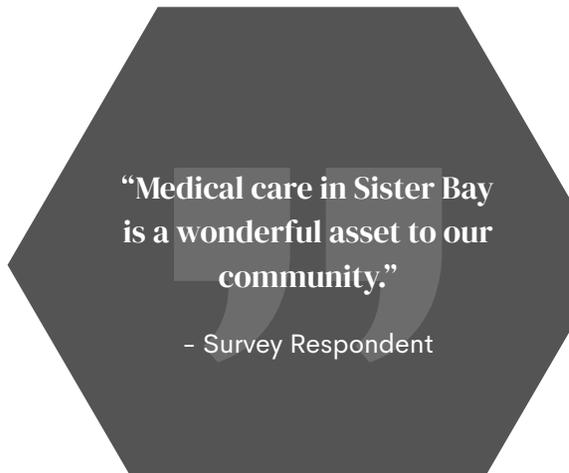

Additionally, Aurora Health Care and Emplify Health (formerly Bellin) have clinics in Sturgeon Bay. Each host several family medicine providers as well as some specialty care providers. Prevea Health hosts specialists within the DCMC hospital campus.

At the beginning of 2025, DCMC transitioned its dental clinic to N.E.W. Community Clinic, a Federally Qualified Health Center. Oral health provider shortages continue to remain a challenge. No private dentists in Door County accept Medicaid.

“The nearest hospital for emergency care is an hour drive away.”

- Survey Respondent

“Medical care in Sister Bay is a wonderful asset to our community.”

Access to Care

Preventative

SCREENINGS

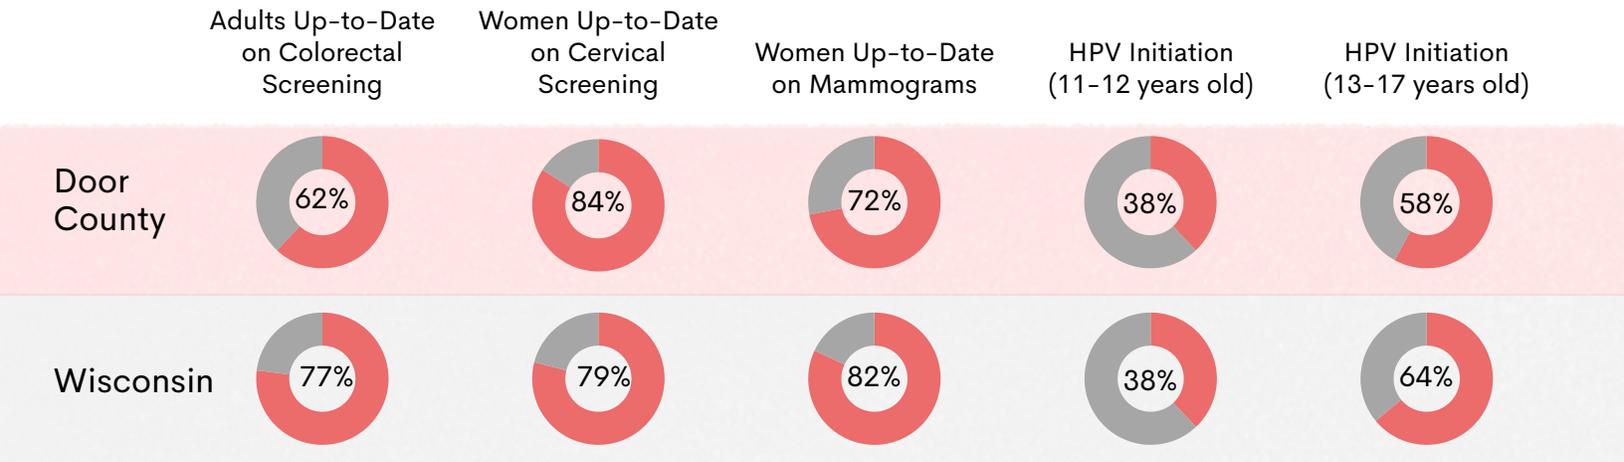

While Door County exceeds state averages in flu and childhood vaccination rates, preventative care for adults shows room for improvement. Mammography and other cancer screenings lag behind, with only 52% of female Medicare enrollees receiving an annual mammogram.³ Addressing these gaps is essential as the county's population continues to age.

At the same time, proactive efforts continue for younger residents—Door County Public Health, with support from the Lions Clubs, conducts vision and hearing screenings in schools and child care facilities to identify concerns early. These screenings help ensure children receive timely referrals for further evaluation.

2650 Door County children screened for hearing and vision problems in 2025

SCREENINGS & PROTECTIVE FACTORS⁴

“When I think about health as an adult, I think about fitness, nutrition, and local facilities to aid in that, and also mental health and facilities to aid with that. Being elderly, I would think, are there facilities to take care of us as elder people if we need?”

-Community Conversation Participant (Rural)

Access to Care

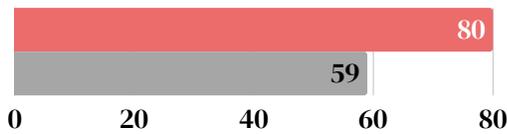

Mental Health & Substance Use

There was one mental health provider per 710 people in Door County, compared to 350:1 for the state and 290:1 for the country.¹ However, this year, DCMC significantly grew their provider team to 12 behavioral health professionals, including a psychiatrist, counselors, and a nurse practitioner. This increase in providers is expected to improve our provider ratio in future data. Both the County and DCMC have expanded their substance use treatment programs, with most therapists now being co-occurring licensed to address substance use and mental health concerns together.

CHA survey results show that awareness of mental health and substance use services in Door County is significantly higher than residents' comfort with using them. Although most respondents know these services exist, only about half feel comfortable accessing care, creating roughly a 20% gap for both service types. In a small, close-knit community, concerns about privacy, stigma, and confidentiality may contribute to this hesitation. These reasons also contribute to disproportionate suicide rates in rural communities, such as Door County.

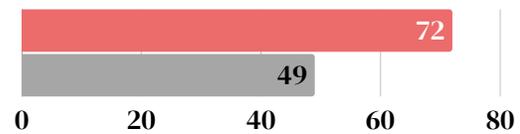

MENTAL HEALTH SERVICES

- % aware of
- % would be comfortable using

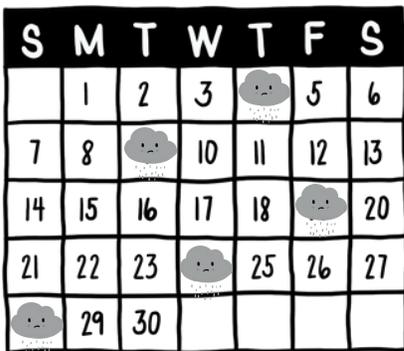

SUBSTANCE USE SERVICES

- % aware of
- % would be comfortable using

In Door County, adults reported that their mental health was not good on 5.1 of the previous 30 days.¹

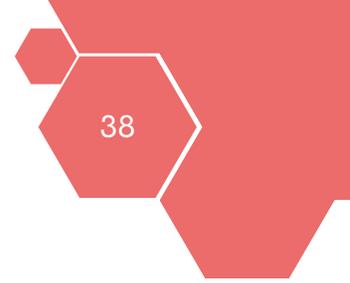

DEATHS BY SUICIDE¹

per 100,000 people

Senior Life Solutions is an intensive outpatient group therapy program at DCMC designed for individuals 65 and older, experiencing depression or anxiety related to life changes that are often associated with aging.

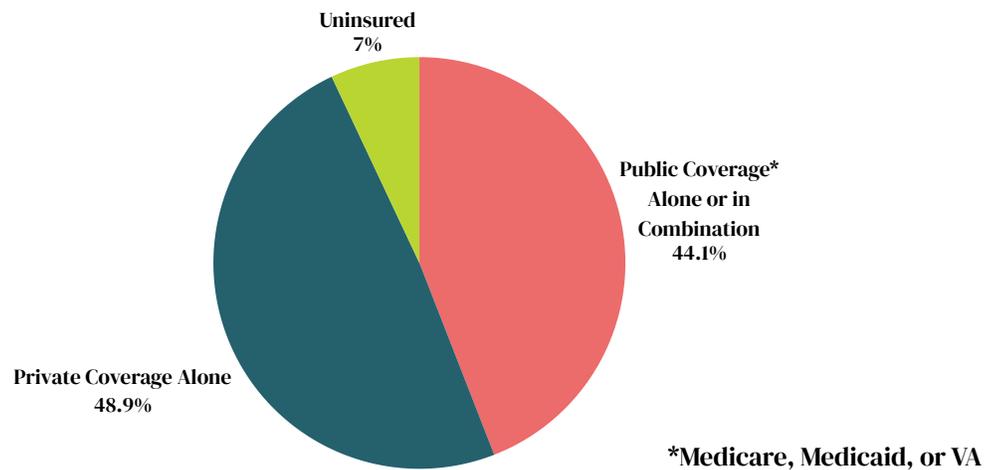

Health Insurance

Health insurance coverage in Door County is comparable to state levels, with a relatively small share of adults under age 65 uninsured; however, the cost of health care and insurance remains a significant community concern. In the CHA survey, **residents ranked "Cost of Health Insurance" as the #1 area to improve related to Access to Care** and it ranked 5th overall. Community members highlighted barriers related to high deductibles, insurance restrictions, and the need to travel outside the county for care, all of which can delay or limit access to services. These concerns underscore that even with insurance, affordability and coverage limitations continue to impact residents' ability to obtain timely and appropriate care.

Over 44% of Door County residents are covered by public health insurance, primarily Medicare with nearly 10,000 covered. Over half of public health insurance recipients pay for additional private health insurance to cover gaps, such as prescription drugs.²

UNINSURED <65¹
County: 7%
State: 6%
Nationally: 10%

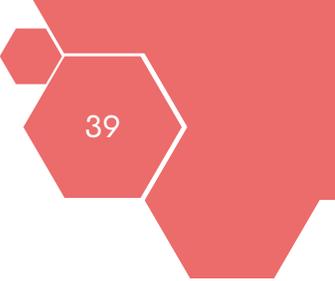

Community members said:

“With health care moving to Green Bay, because of health insurance restrictions, it is difficult to get to and from Green Bay if you have a procedure.”

“There has to be good medical service for everyone, the elderly, and those who don't have insurance. For those that they can't go to the hospital, or are afraid to go to the hospital because of money.”

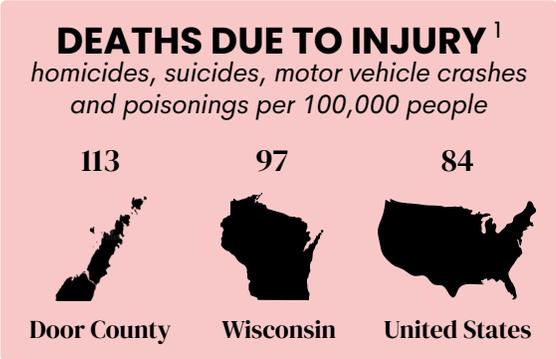

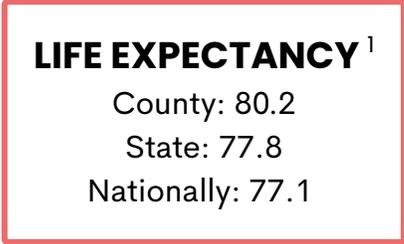

“I have had three emergency room visits in the last week due to my health condition just to get access to that medication.”

“High deductible insurance does not give adequate health care.”

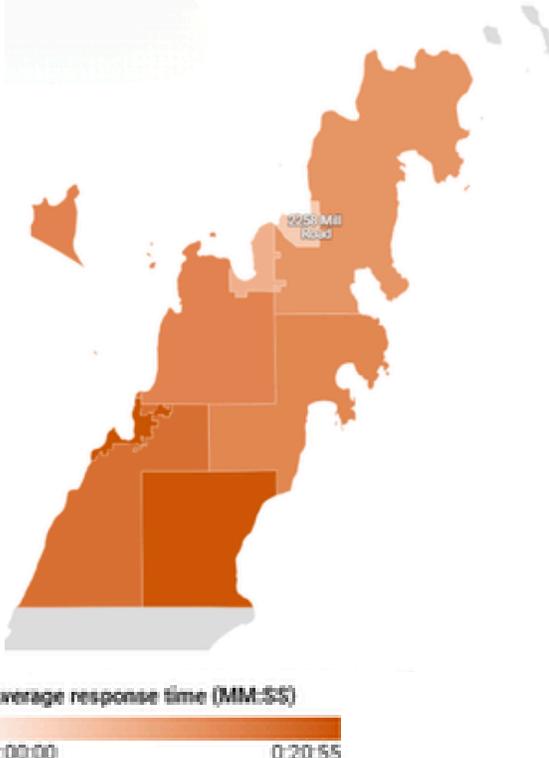

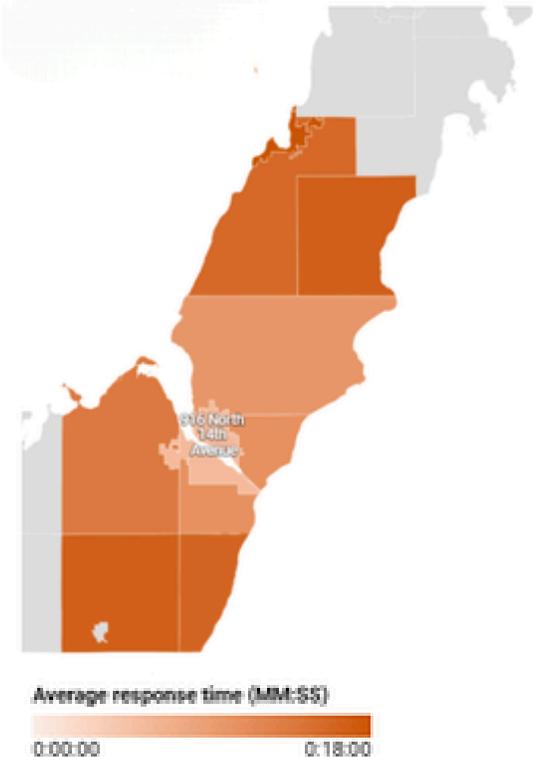

Injury & Mortality

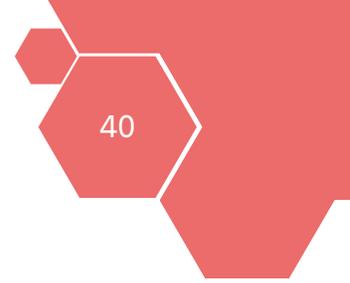

Injury-related deaths in Door County occur at higher rates than state and national levels, with older adults experiencing a disproportionate impact. Emergency medical services are essential to responding to these incidents, and recent investments in emergency services' infrastructure aim to improve response times and access to care across the county. **84% of calls to Door County EMS in 2024 were from residents.**²

DOOR COUNTY EMERGENCY SERVICES AVERAGE RESPONSE TIMES²

In October 2025, the Door County Board of Supervisors voted in favor of adding a fifth Emergency Services station to improve response times in the county. The new station will be located in the Egg Harbor/Jacksonport area. In addition to the central and north stations shown below, there are also stations in Brussels and Washington Island. Current estimated response times are show below.

Injury & Mortality

FALLS

Falls were the #1 injury-related cause of death in 2023, more than car accidents or firearm deaths.³ Door County Emergency Services launched the Community Paramedic Program in January 2025. The purpose of this initiative is to connect Door County residents with supportive in-home services that promote safety, comfort, and overall well-being. The program currently accepts referrals from 911 responses and various health systems. Ambulance crews help identify individuals at risk of falls as well as frequent users of the 911 system. Once identified, a home visit is scheduled to assess needs and discuss additional resources that may benefit the patient.

INJURY DEATHS CAUSED BY FALLS³

Year	Injury Deaths	Fall Death	%
2023	22	13	59%
2022	36	17	47%
2021	28	14	50%
2020	36	19	53%

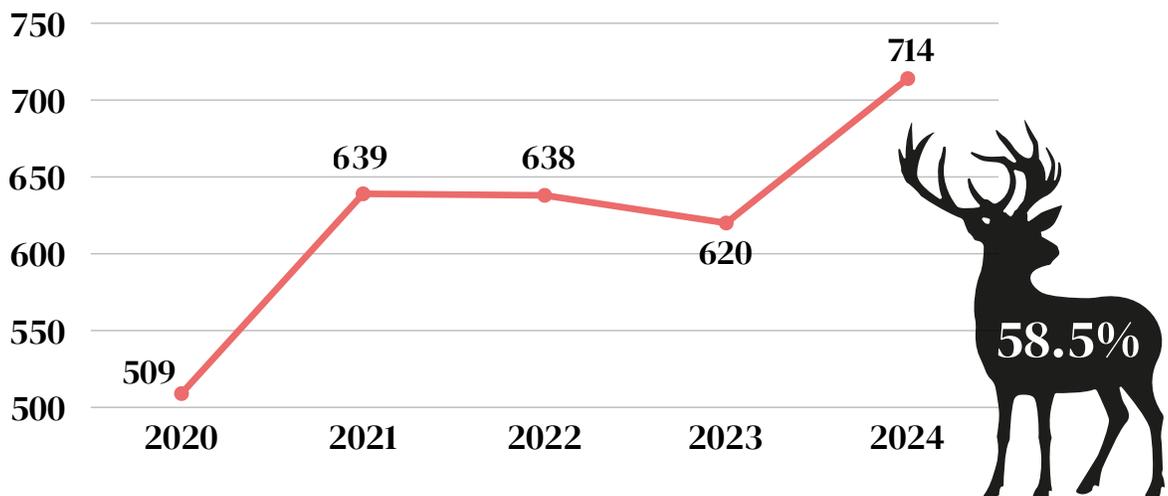

More than 1 in 4 calls to Door County EMS is for falls²

VEHICLE CRASHES

In Door County, there were 12 deaths from motor vehicle crashes per 100,000 people.¹ Deer hits caused 418 vehicle crashes, or 58.5%, in 2024.⁴

Door County Vehicle Crashes

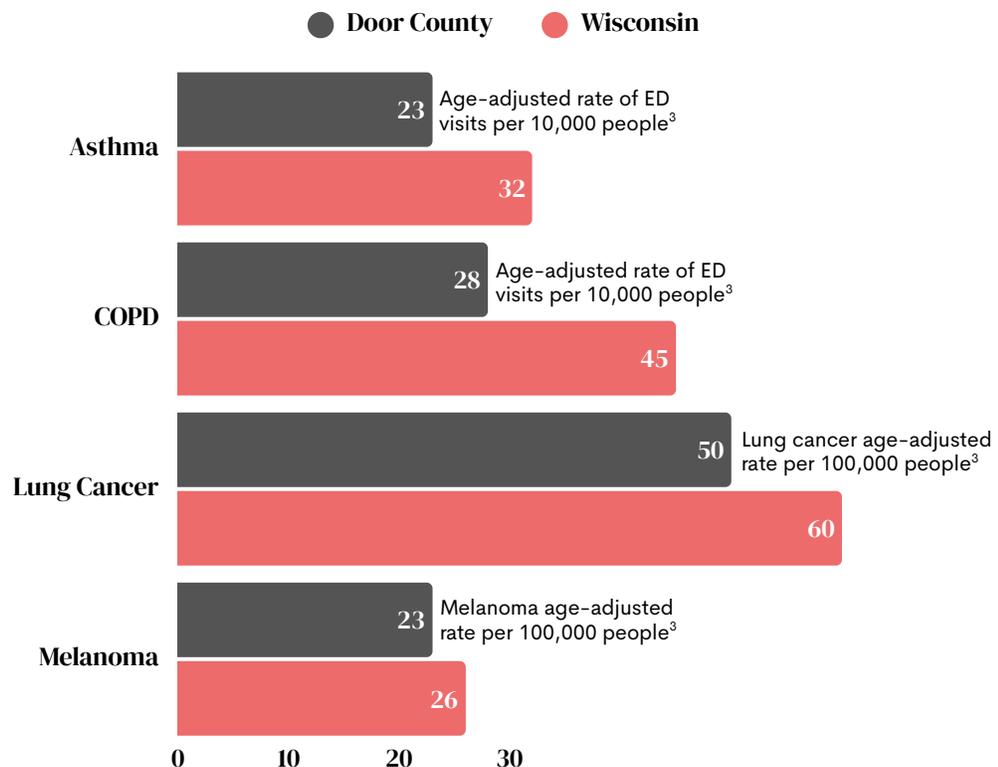

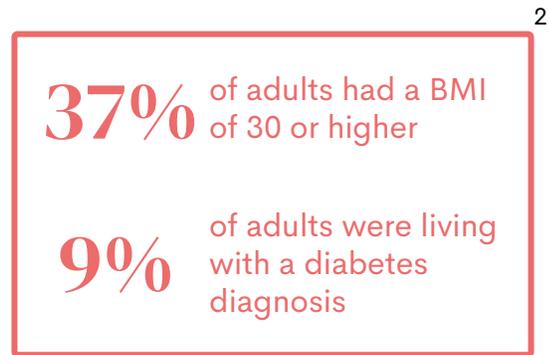

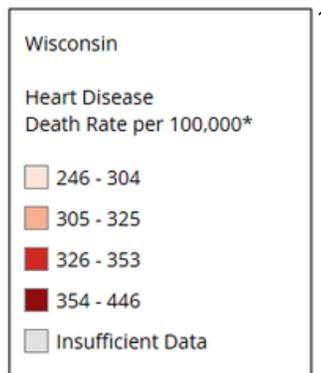

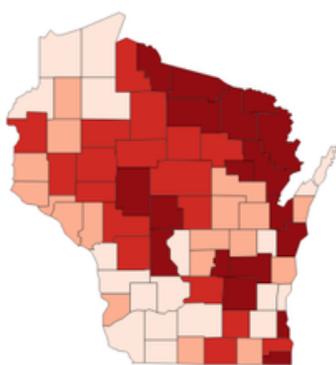

Health Conditions

Chronic Diseases

Chronic diseases continue to contribute significantly to illness and death in Door County. Heart disease is the leading cause of death, with a prevalence of 4.8%, which is lower than the national average; however, the death rate among adults ages 35 and older remains substantial at 305 deaths per 100,000.¹ Chronic conditions related to metabolic health are also common, with 9% of adults diagnosed with diabetes² and 37% having obesity², both of which increase the risk for cardiovascular disease. Additional chronic conditions, including asthma, COPD, lung cancer, and melanoma, impact residents at varying levels compared to Wisconsin averages, highlighting the ongoing need for prevention, early detection, and chronic disease management efforts in Door County.

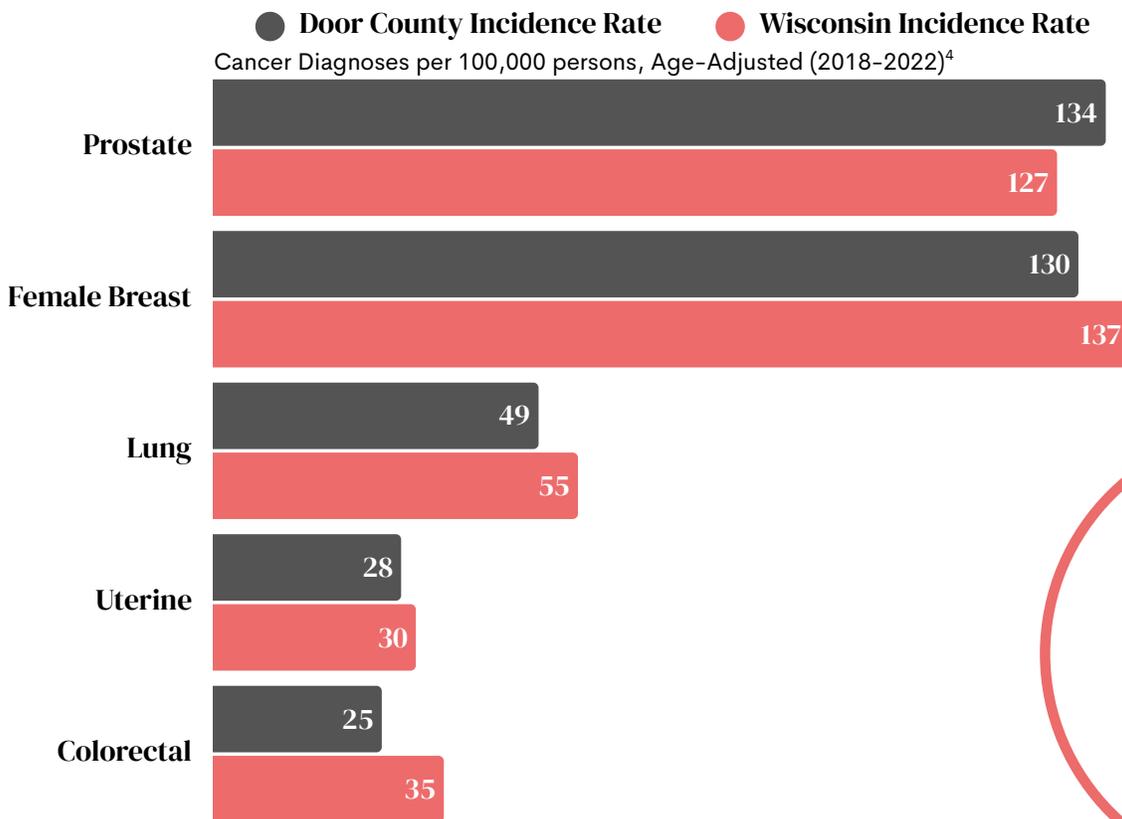

Health Conditions

Chronic Diseases

Cancer remains a chronic disease concern in Door County. From 2018–2022, the county averaged 251 new cancer cases per year, with an age-adjusted incidence rate of 448.2 per 100,000, comparable to the U.S. rate and slightly lower than Wisconsin overall.⁴ Cancer incidence in Door County is trending downward. The most commonly diagnosed cancers are prostate and female breast, followed by lung, colorectal, and bladder.⁴

	Door	WI	US

Neighborhood & Built Environment

Environmental Conditions

Air Quality

Air quality is an important environmental factor influencing chronic disease risk in Door County. The Wisconsin Department of Natural Resources (DNR) monitors ozone levels at a site in Newport State Park. Air quality is increasingly affected by wildfire smoke, which can travel long distances and elevate pollution levels. Fine particulate matter (PM_{2.5}), the primary pollutant of concern from wildfire smoke, has been measured at an annual average of 7.0 micrograms per cubic meter in Door County¹, which is below the EPA's annual standard of 9.0.²

Poor air quality can worsen chronic conditions such as asthma, COPD, and cardiovascular disease, and increase the risk of respiratory symptoms and other health impacts, particularly among sensitive populations.

AIR QUALITY INDEX REPORT (2024)³

# Days with AQI	# Days Good AQI 0-50	# Days Moderate AQI 51-100	# Days Unhealthy for Sensitive Groups AQI 101-150	# Days Unhealthy AQI 151-200	# Days Very Unhealthy AQI 201-300	# Days Hazardous AQI 300+	AQI Max	AQI Median
202	175	25	2	-	-	-	108	37

Air Quality Index is an indicator of overall air quality, because it takes into account all of the criteria air pollutants measured within a geographic area.

Air pollution can harm children and adults in many ways⁴

Respiratory

- Shortness of breath
- Asthma attacks
- Worsening COPD
- Lung cancer

Other

- Premature death
- Susceptibility to infections
- Heart attacks and strokes
- Impaired cognitive functioning
- Metabolic disorders
- Preterm births and low birth weight

Environmental Conditions

Drinking Water

Groundwater in Door County is particularly vulnerable to contamination due to shallow bedrock, thin soils, and a high water table. These factors increase the risk of bacterial and chemical contamination in private wells. Potential sources include septic systems, agricultural runoff, surface spills, and naturally occurring elements such as arsenic.

The City of Sturgeon Bay, the Village of Sister Bay, and the Town of Forestville have municipal water.¹ In Sturgeon Bay, the **city's water system provides water to 9,700 residents**, using approximately 500 million gallons of water annually.² The city relies on five deep wells that access the Silurian Dolomite aquifer system, ensuring a reliable water supply.³ Sturgeon Bay Utilities regularly monitors water quality and provides a [Consumer Confidence Water Quality Report](#)⁴ to ensure safe drinking water for its residents. Sturgeon Bay Waterworks fluorinates their water system and reported levels of 0.6 mg/L on their 2024 report. The U.S. Department of Health and Human Services recommends a level of 0.7 milligrams per Liter (mg/L) of fluoride in your drinking water. This is the level that prevents tooth decay and promotes good oral health.⁵

There are approximately **8,000 private wells that supply water to around two-thirds of the population**.¹ Private well owners are responsible for testing and maintaining their well. It is recommended that wells are tested once a year for bacteria and nitrates and additional tests are available. Since 2019, the University of Wisconsin–Oshkosh (UWO) has provided discounted well monitoring in spring and fall. Additional [well testing options](#) are available.⁷

30%

In 2025, 30% of WellTAP tests administered by Door County Public Health were positive for coliform bacteria.

23%

In 2025, 23% of water samples taken during the UWO Door County Private Well Monitoring Program were elevated (2+ mg/L) for nitrate.⁶

8.5%

In 2025, 8.5% of water samples taken during the UWO Door County Private Well Monitoring Program were elevated (>0 MPN/100 mL) for coliform bacteria.⁶

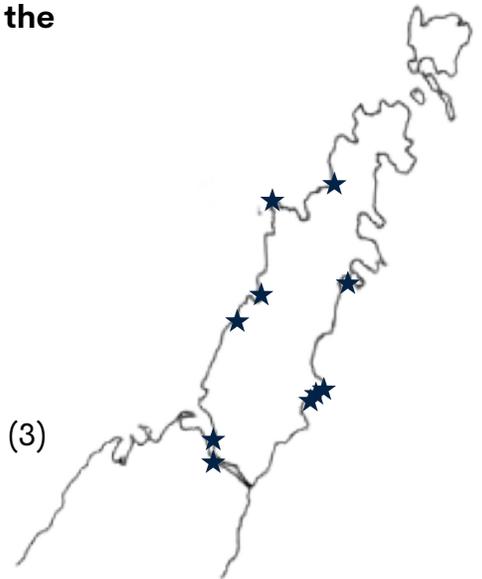

Environmental Conditions Beaches

Door County Public Health partners with the UWO to conduct comprehensive **beach monitoring at up to 55 public beach sites each summer**. From June through August, college students from around the state are contracted to test Door County beaches. Beaches are sampled one to four times per week based on their level of use, ensuring frequent surveillance of conditions where the public swims most. When bacteria levels exceed thresholds, Door County Public Health issues advisories or temporary closures to protect residents and visitors. This long-standing program, established in 2003 under the federal BEACH Act¹, plays a key role in safeguarding the county's recreational waters.

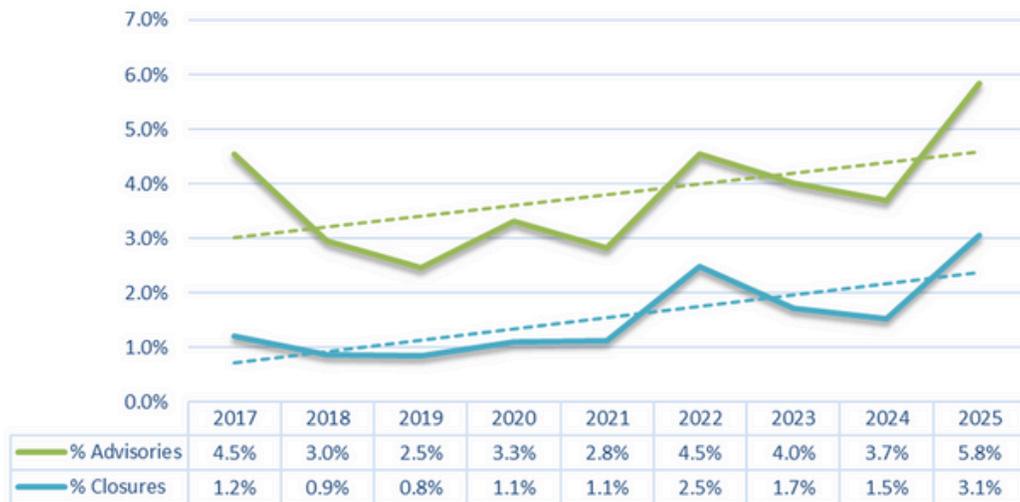

Electronic beach signs are at the following locations:

- Baileys Harbor Ridges Park
- Egg Harbor
- Frank E Murphy Park
- Nicolet Beach
- Otumba Park
- Sister Bay Park
- Sunset Park
- Whitefish Dunes State Park (3)

ADVISORIES AND CLOSURES FOR DOOR COUNTY BEACHES FROM 2017–2025²

Housing Hazards

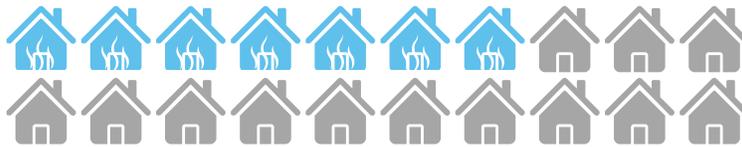

Door County's unique geology and housing characteristics contribute to elevated risks from several key home hazards, including radon, lead, and carbon monoxide. The county sits on dense limestone bedrock; a geological feature associated with higher radon potential because radon gases can move more easily through porous stone and into homes.

Carbon monoxide risks are also shaped by local conditions: many households rely on propane-fueled heating systems, and propane appliances can produce carbon monoxide when they malfunction or burn fuel incompletely, a concern heightened during long, cold winters when heating systems run continuously.

Lead exposure remains a hazard as well, particularly in older housing stock and in communities with historic shipbuilding and manufacturing activity. Together, these factors help explain why Door County's environmental health ratings for home hazards trend higher than in other regions.

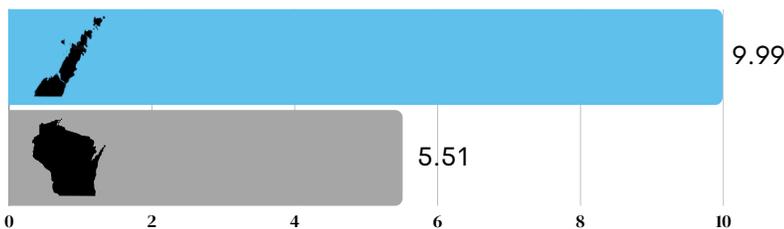

RADON

Radon is the leading cause of lung cancer in non-smokers. **35% of radon tests done in Door County came back with elevated levels** of 4 pCi/L and above¹

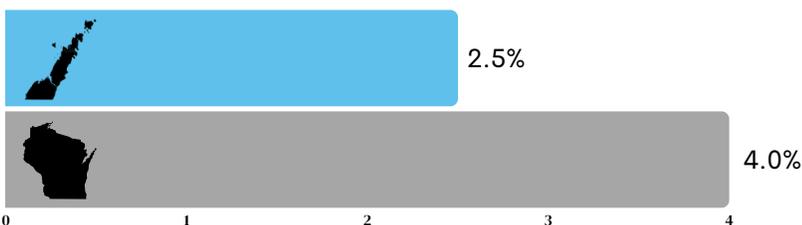

CARBON MONOXIDE

Carbon monoxide is a colorless, odorless gas that can lead to death if inhaled in significant amounts. Below is the age-adjusted rate of ED visits per 100,000 people.²

LEAD

Lead exposure can have permanent and harmful effects on a child's brain and nervous system. There is no safe level of lead in a child's blood. Below is the percent of tested children with blood lead greater than or equal to 5ug/dL.²

Child Blood Lead Tests in Door County ³		
Year	Blood Draws	Elevated Blood Lead Levels (>3.5)
2023	261	3
2024	266	14
2025	311	10

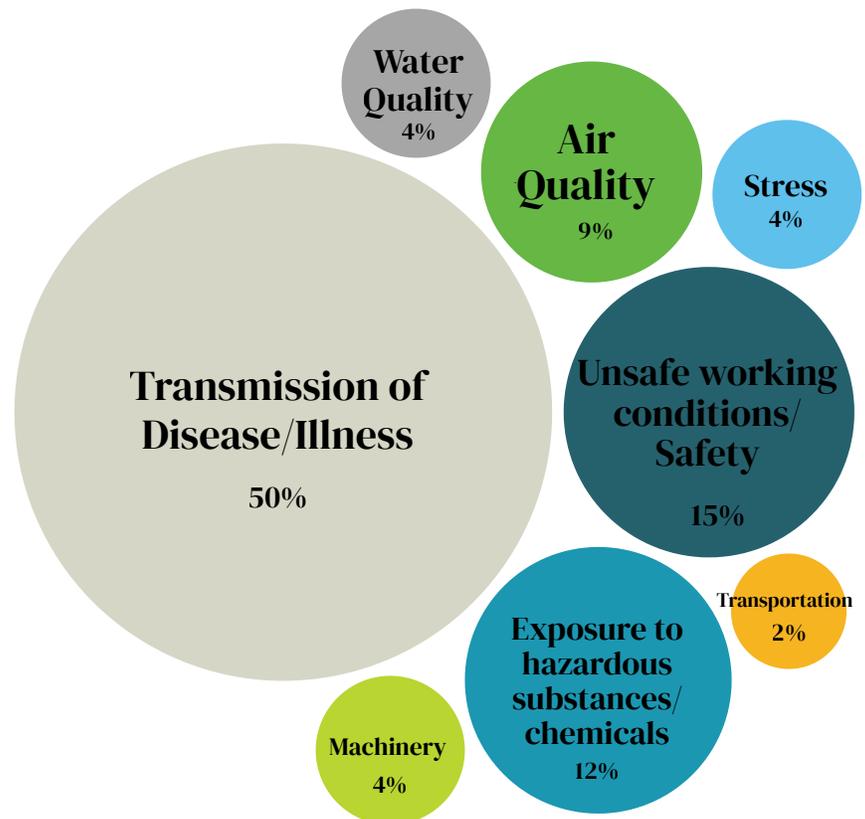

Occupational Hazards

Door County's leading industries—farming, manufacturing, shipbuilding, and hospitality—bring distinct occupational hazards that shape workers' daily experiences. Agricultural employees face risks such as blastomycosis exposure and frequent animal contact, while manufacturing and shipyard workers may encounter lead hazards and other industrial contaminants. Hospitality workers experience their own challenges, including exposure to infectious illnesses from high visitor turnover and injuries in fast-paced environments. Seasonal extremes also pose risks across sectors, from heat stress in the summer to dangerous cold-weather conditions in winter. These challenges underscore how workers across very different sectors face shared vulnerabilities that deserve continued attention.

OCCUPATIONAL HAZARDS REPORTED

from survey

12.5%
of survey participants reported they are worried about being exposed to things that can harm their health at work

“Our biggest challenges are because we are a growing community, the needs for services and demands on our department continue to increase. We are asked to do more without increasing staff. This leads to more fatigue of staff, mental health and burn out.”

- Community Leader
(First Responder)

Nutrition & Physical Activity

Door County's rural environment presents unique barriers to healthy eating and active living, from limited access to fresh, affordable foods to long distances between communities that make regular physical activity difficult to incorporate into daily routines.

Despite these challenges, the county is making meaningful progress toward a healthier future. The continued expansion of bike trails is creating safer, more accessible opportunities for residents and visitors to stay active, while the strong presence of the Door County YMCA provides year-round programs, facilities, and community support that help people of all ages build healthier habits. Together, these efforts reflect a growing commitment to improving nutrition and physical activity across the county.

ACCESS TO EXERCISE OPPORTUNITIES ¹

adequate access to park or recreation facility*

“The small improvements for bike and pedestrian traffic are a good start; much more work is needed to reduce dependency on cars.”

- Survey Respondent

Nutrition & Physical Activity

The below is an index of fruit/vegetable and soda expenditures created by US News in collaboration with the University of Missouri. Higher levels of fruit and vegetable expenditure with lower levels of soda expenditure correlated to lower rates of diabetes and obesity. Door County performed better than the state and country in these indexes.²

	Door	WI	US
At-Home Fruit/Veg Expenditure	79.24	70.32	64.15
At-Home Soda Expenditure	22.77	31.08	38.37
Diabetes Prevalence	7.20%	8.10%	10.60%
Obesity Prevalence	34.20%	34.80%	37.40%

Nutrition & Physical Activity

The walkability in Door County is highly localized, with Sturgeon Bay far more walkable than most other municipalities. While the county is known for hiking and other outdoor activities, walkability varies significantly between towns and rural areas. The [Door County Trails](#) initiative is working toward expanding trails to improve connectivity between municipalities and expand active transportation.³ The following table shows the walkability and bikeability scores for various municipalities in Door County.⁴

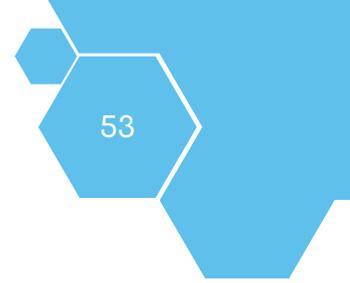

Baileys Harbor:	24	35
Brussels:	17	34
Egg Harbor:	14	15
Ellison Bay	38	33
Ephraim:	32	35
Fish Creek:	50	33

Sturgeon Bay:	73	50
Washington Island:	9	27

I would like to bike to the grocery store but I don't feel safe sharing the road with cars and trucks.

- Survey Respondent

Transportation

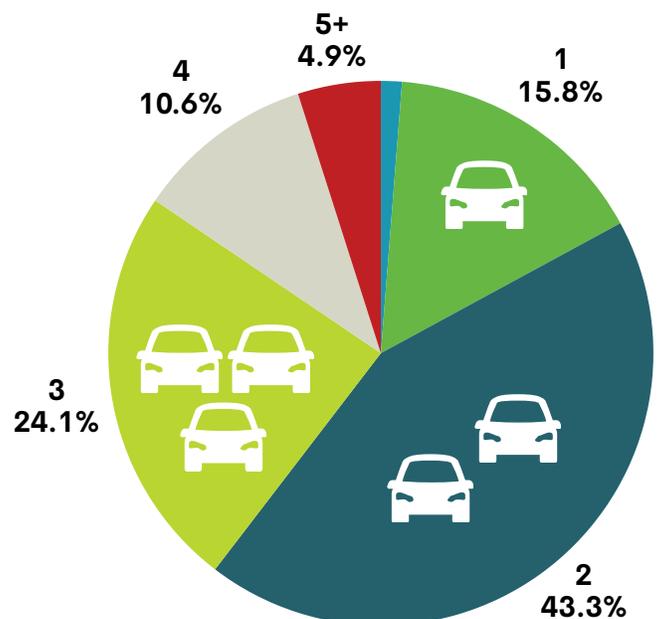

Door County's long, narrow peninsula—surrounded by water and including an island community—creates transportation challenges uncommon in many rural areas. Therefore the county is heavily vehicle-reliant, with roughly **99% of households owning at least one car**¹. Although only a small portion of residents are without a vehicle, ensuring transportation access for everyone remains essential, especially as the county's aging population continues to grow and demand for services increases.

Public transit options are limited, but our county benefits from several established services. Door-2-Door Rides and Door County Connect provide accessible public transportation, while Door-Tran's programs, including its volunteer driver service, offer critical support for eligible riders. A small number of private taxi companies further expand mobility options.

Together, these resources give residents viable transportation choices to navigate the county's geographic complexity. However, they still fall short of meeting all community needs. Limited hours, advance scheduling requirements, higher costs for zones outside Sturgeon Bay², and restricted out-of-county service create barriers that can make it difficult for people, especially those without personal vehicles or with unpredictable schedules, to reliably reach work, medical care, and other essential destinations.

Vehicles per Household in Door County³

12.6%

of survey respondents said they **missed work or an appointment due to transportation.**

The top reason chosen (30%) was public transportation not available, followed by unreliable vehicle (17%).

Community members said:

“Transportation could become an issue as we age in place.”

“There is no true viable option for public transportation in Northern Door County. There never has been. Aside from the bus in Sister Bay there is no reasonable option for any sort of public transportation. There are very few Uber or Lyft Drivers here and because of this it is very hard to depend on them. You might be able to get a ride to your location, but not able to get a ride home.”

“It would be ideal to have improved public transportation in the area for those individuals who are unable to drive. Northern Door County has very limited reliable options.”

“...being almost an hour away from the medical center and two hours from Green Bay medical centers - the biggest factor that will force us to move is lack of transportation should we no longer be able to drive.”

Social & Community Context

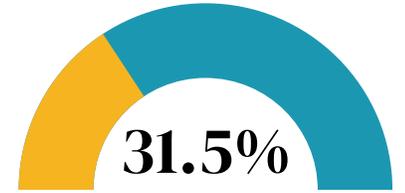

Aging Population

Door County has one of the oldest age profiles in Wisconsin, with a **median age of 54.1**¹ and those 65+ making up nearly a third of the population.

We currently **rank third by concentration of population of 65+**, with Iron and Adams having slightly higher ratios. We are sixth out of 72 counties by median age, with Iron County being the oldest at 55.9.²

Our aging population reflects both long-term residents aging in place and the county's appeal as a retirement destination.

of Door County residents are 65+ compared to 18% in Wisconsin²

“One of the most significant challenges we are facing is the growing aging population and the corresponding lack of adequate services and supports to meet their needs. Additionally, the high cost of housing makes it difficult for workers to live and remain in the area. While the demand for services continues to rise, available funding has not kept pace.”

- Community Leader
(Local Government)

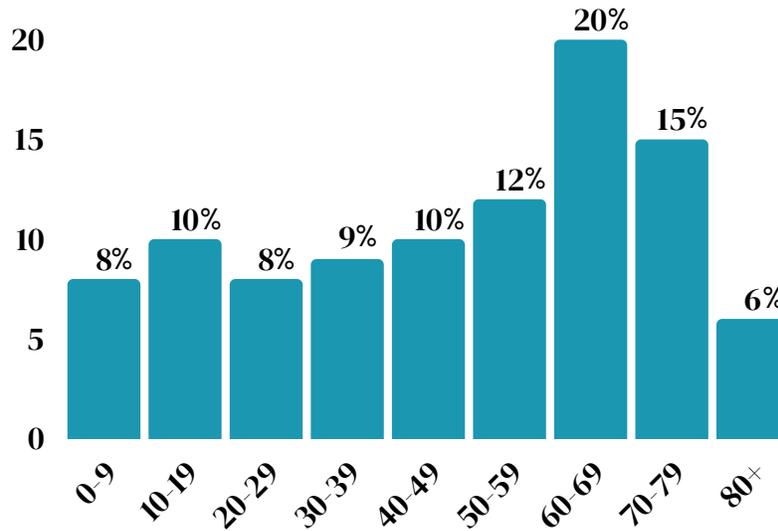

“Increasing affordability of resources could benefit the quality of life of the people that we serve. With an aging population, it will be important for our community to support the older population while still working diligently to attract younger families for our county's businesses and infrastructure.”

- Community Leader
(Business)

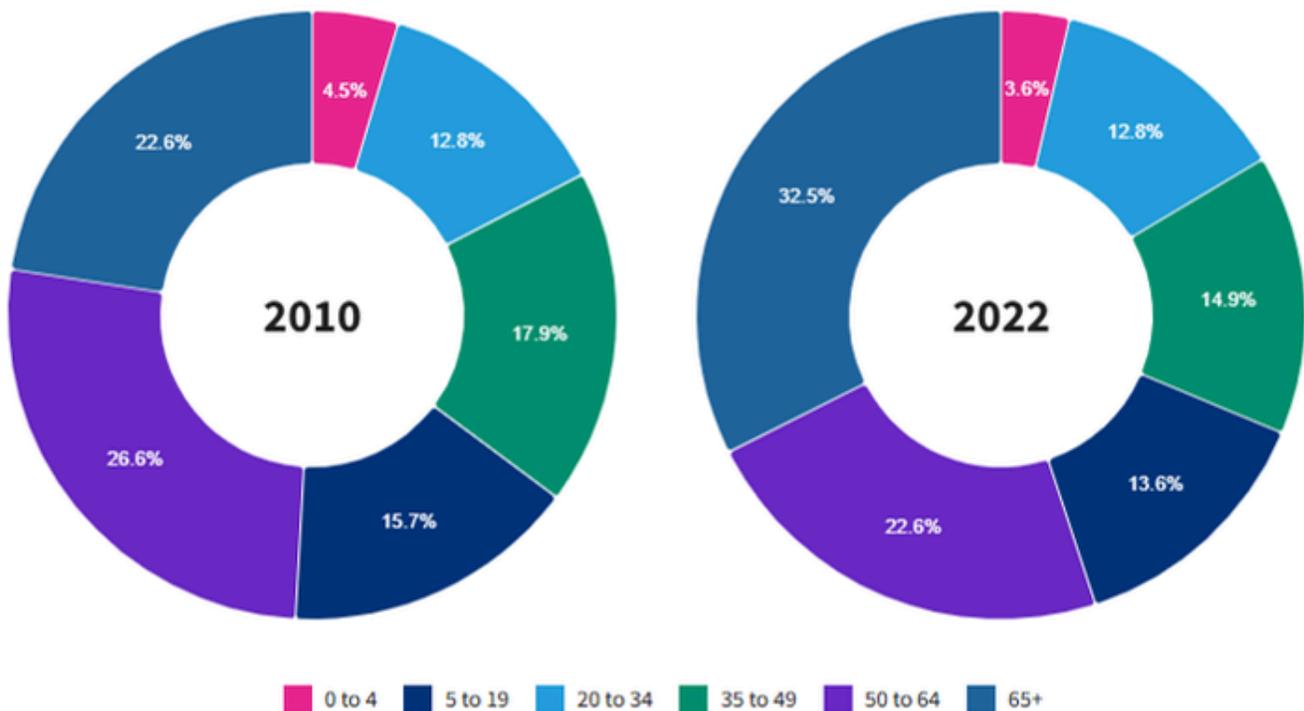

Aging Population

AGE MAKEUP OF DOOR COUNTY ⁴

CHANGING AGE MAKEUP ⁵

The share of the population that is **65 and older increased from 22.6% in 2010 to 32.5% in 2022**. During that same time, the 0 to 4 population decreased from 4.5% to 3.6%. This aging trend has implications for healthcare demand, workforce availability, and social services, while also affecting local schools, housing needs, and community planning.

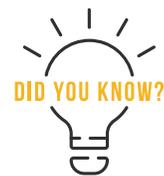

Social Connection

Social connection is a vital component of community health, and in Door County, both young adults and older residents have expressed a strong desire for more opportunities to socialize, ranking it as the **second-highest concern in community conversations**. Despite this, the county demonstrates notable civic engagement: 88.3% of eligible residents voted in the 2020 presidential election, far surpassing state and national averages.¹ Civic participation is an indicator of belonging and shared responsibility. Door County also boasts a high rate of social associations, indicating strong infrastructure for clubs, organizations, and community groups. These civic spaces and networks not only foster participation and shared purpose but also serve as key venues for building relationships, reducing isolation, and strengthening the social fabric across generations.

SOCIAL ASSOCIATIONS PER 10K PEOPLE ¹

County: 18.3
State: 11.1
Nationally: 9.1

Lacking social connection can increase the risk for premature death as much as smoking up to **15 cigarettes** a day.²

23% of Door County adults report that they sometimes, rarely, or never get the social and emotional support that they need.¹

This is slightly better than the state and national rate of 25%.

“We’ve got a lot of great outdoor resources, but something I hear a lot is that people are looking for inside things to do that aren’t alcohol based.”

- Community Conversation Participant (Young Adult)

“I feel like for my mental health and some of the challenges I’m seeing really revolve around having some socialization time for myself, like time for myself, my ability to go out or hang out with other people where I don’t have to be a mom. And I don’t have my kids really has been a challenge.”

- Community Conversation Participant (Families with Young Children)

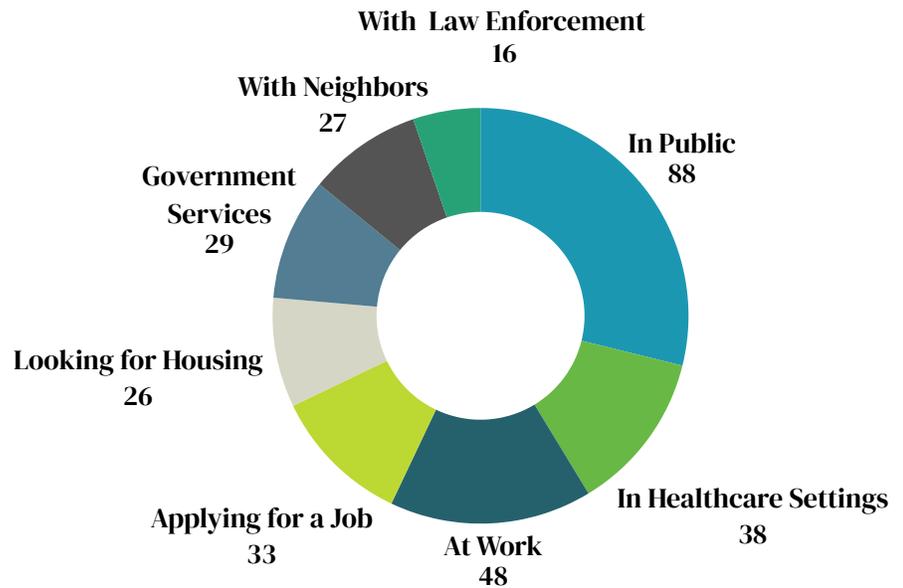

Discrimination

Door County experiences several forms of social tension that can contribute to feelings of discrimination or exclusion. The county's limited racial and ethnic diversity, combined with a tense political climate and closely contested elections, can heighten polarization and strain community relationships. Friction also emerges between long-time rural residents and newer retirees, as well as between year-round and seasonal residents, each group bringing different expectations and priorities. These dynamics can create barriers to belonging and participation, underscoring the need for continued efforts to strengthen community cohesion and inclusivity.

15%
of survey participants reported they or someone in their household experienced discrimination in Door County.

“I know people here in Door County who have been discriminated in their work place, getting health care, trying to access buildings and events because of because of their sexual orientation, gender identity, race, and disability.”

- Survey Respondent

“We have to recognize that we have discrimination in our county before we can correct it. We have to realize that everyone does not feel safe here.”

- Survey Respondent

Alcohol & Drug Use

Door County is not immune to challenges related to alcohol and drug use. An alcohol-centric culture and rising concerns around opioids, fentanyl, and methamphetamine place pressure on local systems. Limited treatment capacity forces many residents to seek detox or residential care outside the county, contributing to increased strain on law enforcement, courts, and child-welfare services.

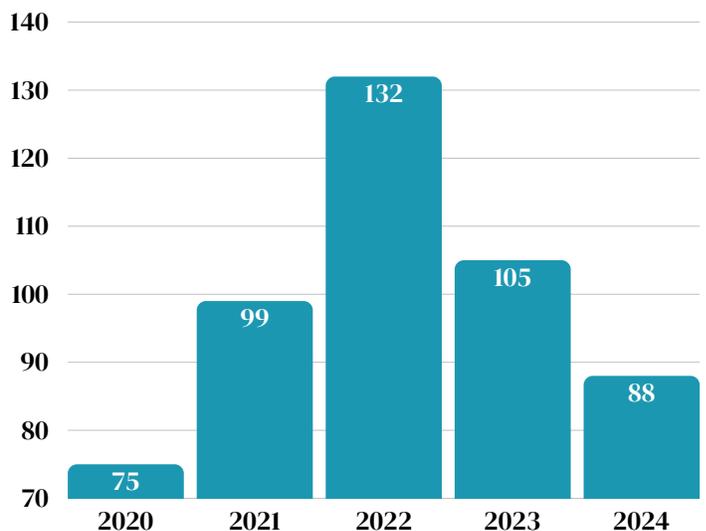

In response, the county is working to strengthen its continuum of care through initiatives such as Treatment Court, development of sober-living homes, and expanded access to co-occurring mental-health and substance-use treatment. These are critical steps toward improving community health and family stability.

25% of Door County residents binge drink compared to 19% in the US¹

Binge drinking is defined as consuming 5 or more drinks on an occasion for men, or 4 or more drinks on an occasion for women.²

OWI Arrests, Door County Sheriff's Office

“Other than a bar, it’s hard to find something that’s open after five.”

- Community Conversation Participant (Young Adult)

35% of motor vehicle crash deaths involved alcohol. Compared to 31% at State and 26% in the US.⁴

ChatGPT-5 and Microsoft Copilot (OpenAI, accessed 10/2025-1/2026) were used to synthesize key findings from the community health survey data and provided suggestions narrative content throughout the report. All AI-generated text was reviewed, verified for accuracy against original documents, and edited by report authors before inclusion.

Appendix A: Community Conversation Guide and Questions

2025 COMMUNITY HEALTH ASSESSMENT

COMMUNITY CONVERSATION GUIDE

TIPS FOR HOSTS:

- Familiarize yourself with the questions ahead of the conversation. Note the optional rephrase questions that can be used, if needed.
- Remain neutral in your role as facilitator.
- Be okay with silence in order to get people to talk.
- Make sure to give adequate time for people to process the question and formulate their thoughts/answers.
- Seek feedback from all participants and alternate the first to respond as best as possible.
- Use open-ended phrases such as “Tell me more,” to encourage additional contributions, if needed.
- Try to keep the conversation on track and discourage political commentary. Remind participants that there is a forum for those conversations, but it does not serve the purpose of this forum.

WELCOME/PURPOSE OF THE COMMUNITY CONVERSATION

Welcome and thank you so much for your time today! I am [Your Name], and I am [Your Role/Organization] and I will be facilitating this conversation today. We are here to have a crucial conversation about health, as part of a larger health assessment. This conversation helps local organizations, including Door County Public Health, Door County Medical Center, and many others identify and collaboratively address health issues, needs, and priorities. This helps guide our work and ultimately leads to better health outcomes and more effective programs and policies.

EXPECTATIONS/INTRODUCTIONS

Ground Rules: We will listen respectfully to each other, share our perspectives openly, and focus on finding common ground to improve our community's health. We are here to talk about the state of health in Door County and its successes, failures, and impacts—and most importantly, your relationship with these successes, failures, and impacts. We want to ensure that the meeting remains productive, civil, and respectful.

Expectations: We'll start with introductions, then move into a facilitated discussion, and conclude with next steps. We will do our best to allow everyone a chance to respond to each question. If you do not want to respond to a specific question, you can pass. If we need to move on from a question before everyone has replied, you may use the provided note paper to share your input. The questions will ask about your personal experiences as well as broader community experiences. Does anyone have any questions about the process before we begin?

Group Introductions: Ask participants to share their first name and where they are from.

QUESTIONS

1. What do you think about when you think about health? Think about **personal** health and **community** health.
2. What strengths does Door County have that contribute to health and quality of life?
3. What is the biggest challenge **you** face on a daily basis? Please choose just one to share.
 - a. Optional Rephrase: Think about barriers you experience.
4. What seems to be the **community's** biggest challenge or top issue?
 - a. Optional Rephrase: Think about barriers in our community.
5. What changes or improvements would enhance your overall health and quality of life?
 - a. Optional Rephrase: What are your hopes for the future for you and your family?
6. If we did everything right, what would a healthy community look like five years from now?

If time allows, please ask the question below and/or offer participants to revisit an earlier topic or questions.

7. Now that we are at the end, are there other areas related to improving health and quality of life that we haven't talked about and are important to you?

THANK YOU AND NEXT STEPS

Thank you again for your time and participation! The insights gained from these community conversations are a vital part to the assessment process for Door County. A community survey will be available from June through August and you all are encouraged to participate in that as well. All of the information gathered will help shape the priority areas of many Door County agencies for the next five years.

Appendix B: Stakeholder Questionnaire

2025 Community Health Assessment Stakeholder Questionnaire

Thank you for taking the time to complete this questionnaire. Your input is a valuable part of the 2025 Community Health Assessment (CHA), which helps identify health issues and opportunities in Door County. This assessment directly informs the 2026–2030 Community Health Improvement Plan (CHIP), which guides efforts to improve community health over the next five years.

The CHA and CHIP are required activities for both Door County Public Health and Door County Medical Center, and are widely used by local partners to align strategies, priorities, and resources. Your perspective as a stakeholder is essential to this process—we appreciate your contribution!

Name *

First Name

Last Name

example@example.com

Phone Number

Please enter a valid phone number.

Position/Title(s) *

Name of Organization *

How long have you worked and/or lived in Door County?

What strengths does Door County have that contribute to health and quality of life?

What are the biggest challenges your organization faces on a daily basis?

What are the community's biggest challenges or top issues?

What changes or improvements would enhance the overall health and quality of life of the staff at your organization, if applicable?

What changes or improvements would enhance the overall health and quality of life of the people you serve, if applicable?

If we did everything right, what would a healthy community look like five years from now?

Appendix C: Community Health Survey

2025 Community Health Survey

This survey is for people ages 16+ who live and/or work in Door County. The survey is anonymous and should take approximately 10 minutes to complete. At the end of the survey, you will have the opportunity to enter a weekly drawing for a chance to win a \$25 Destination Door County gift certificate. This entry will not be tied to your survey in any way. If you have questions or concerns about this survey, please contact Shauna Blackledge at Door County Public Health, sblackledge@co.door.wi.us or 920-746-2233.

What are your connections to Door County?

Select all that apply.

- I live here full-time
- I live here part-time
- I work here
- I retired here
- I am a student of a school in Door County

How long have you lived or worked in Door County?

- Less than a year
- 1-3 years
- 4-6 years
- 7-10 years
- 10-20 years
- 20+ years

Only answer the following question if you do not live in Door County:

If you would like to live in Door County, but do not, what is the reason you don't? Select all that apply.

- Affordability
- Cost/Availability of Housing
- Family Reasons (i.e. distance, child care)
- Lack of Services/Amenities (i.e. healthcare, schools)
- Lack of Social Opportunities
- Willing to Commute
- I do not want to live in Door County
- Other:

If you live in Door County part-time, how many months of the year do you typically live in Door County?

- 10+ months
- 6-9 months
- 2-5 months
- Less than 2 months
- I live in Door County during the week for work, but have a residence elsewhere
- I live in Door County full-time
- I do not live in Door County

What is the primary Door County ZIP code where you LIVE? Leave blank if not applicable.

What is the primary Door County ZIP code where you WORK? Leave blank if not applicable.

Choose the option(s) that describe your current employment status. *Select all that apply.*

#10	Aging Support and Resources	84	9.00%

Appendix E: School Funding Adequacy

Source: County Health Rankings & Roadmaps

	Door County	Wisconsin	United States
School Funding Adequacy	\$8,057	\$1,807	\$1,411

In Door County, Wisconsin, on average, per-pupil spending among school districts was \$8,057 above the estimated amount needed to support students in achieving average US test scores.

Definition: The average gap in dollars between actual and required spending per pupil among public school districts. Required spending is an estimate of dollars needed to achieve U.S. average test scores in each district.

Years of data used: 2022

School Funding Adequacy in Door County, WI
Additional information is needed to interpret the trend for this measure

Year	Door County	Wisconsin	United States
2010	\$5,191	\$1,635	\$1,141
2011	\$5,457	\$2,057	\$862
2012	\$4,665	\$924	\$617
2013	\$4,365	\$562	\$387
2014	\$3,792	\$322	\$355
2015	\$3,755	\$812	\$461
2016	\$4,454	\$540	\$432
2017	\$4,622	\$894	\$502
2018	\$4,678	\$815	\$500
2019	\$5,243	\$649	\$735
2020	\$4,908	\$690	\$836
2021	\$6,908	\$355	\$634
2022	\$8,057	\$1,807	\$1,411

*School Funding Adequacy is the actual per-pupil spending compared with an estimated amount that would need to be spent to achieve U.S. average test scores in each school district. The county value is the cross-district average of the spending surplus or deficit.
